

Opportunity Title: 2022 Energy Storage Summer Internships

Opportunity Reference Code: DOE-EERE-EnergyStorage-2022

Organization U.S. Department of Energy (DOE)

Reference Code DOE-EERE-EnergyStorage-2022

How to Apply Click on *Apply* to start your application.

Application Deadline 1/25/2022 11:59:59 PM Eastern Time Zone

Description Energy storage technology holds the key to ushering in the electric vehicle transformation and in creating the grid of the future with integrated resiliency and flexibility. Today's battery technology is not enough. **Newer chemistries, battery designs, and manufacturing processes are needed to usher changes in energy storage that can fundamentally transform the world and lead to the birth of new industries.**

The U.S. Department of Energy (DOE), Office of Energy Efficiency and Renewable Energy (EERE) Energy Storage Internship Program offers 10-week, hands-on, practical internships at [U.S. national laboratories](#). Participants will conduct research or other technical activities under the guidance of a mentor who is a technical staff scientist or engineer at a national laboratory.

Why should I apply?

As a participant in the EERE Energy Storage Internship Program, you will gain a competitive edge as you apply your education, talent, and skills to research and development projects focused on energy storage. You will also be able to establish connections with DOE scientists and subject matter experts that promote long-term relationships between yourself, researchers, and DOE.

What will I be doing?

Internship activities will vary based on the assigned research project and hosting facility. You have the opportunity to choose the project you're most interested in for the summer! As part of your application, you will identify your top 3 research projects from the 2022 Energy Storage Project Catalog. You can review the catalog here: [***https://orise.orau.gov/AMOSummer/energy-storage/default.html***](https://orise.orau.gov/AMOSummer/energy-storage/default.html) by scrolling to the bottom of the webpage. The project catalog will be updated on an ongoing basis throughout the application period. All available projects will be listed no later than 2 weeks prior to the close of the application period.

Benefits

- **Stipend:** Based on academic level at the start of your internship appointment.
 - Undergraduate students, and post-bachelors receive \$700 per week
 - Masters students or post- masters receive \$900 per week
 - Doctoral students and postdoctoral receive \$1000 per week
- **Travel:** Travel reimbursement for inbound and outbound expenses up to a combined maximum of \$2,000 if you live more than fifty miles, one-way, from your assigned hosting laboratory.
- **Training/Research Allowance:** Up to \$250 to offset relevant costs, such as fees for submitting research for publication, access to relevant training, etc.
- **Housing Allowance:** A housing stipend starting at \$150 per week. Additional housing stipend may be provided to offset high cost of living in certain locations.

Appointment Details

- Appointments will be for 10 consecutive weeks during the months of May-September 2022. Factors such

Opportunity Title: 2022 Energy Storage Summer Internships

Opportunity Reference Code: DOE-EERE-EnergyStorage-2022

as class schedules, housing availability, and laboratory schedules may be taken into consideration when determining appointment start and end dates.

- An appointment involves a full-time commitment at the host laboratory with the intern in residence on-site at the specified location.
- Interns are required to have health insurance coverage during the appointment period and to provide proof of this coverage prior to the start of the appointment.

In response to the evolving situation related to the COVID-19 pandemic, hosting sites may modify their operation schedule and access to facilities to ensure the health and safety of their entire workforce while maintaining operational effectiveness. Hence, the appointment date and location are subject to change contingent on hosting site guidelines and may result in a virtual placement.

Review and Selection Process

1. Hosting sites will review applications based on educational background, experience, interests, skills, career goals, and fit for projects.
2. Hosting laboratories will submit their recommended candidates to ORISE.
3. Selected applications will undergo an eligibility and compliance check by ORISE.
4. Final selection will be made by a federal official from EERE.
5. EERE will notify ORISE of final selections and ORISE will notify selected candidates and hosting laboratories.

Nature of Appointment

Participants will not enter into an employee/employer relationship with ORISE, ORAU, DOE, or hosting laboratory. Instead, participants will be affiliated with ORISE for the administration of the appointment through the ORISE Letter of Appointment and Terms of Appointment.

Background

The strong university and national laboratory-led research and development (R&D) community in the U.S. coupled with a growing industrial community from material suppliers to cell makers, auto manufactures, and utilities supports an innovation ecosystem with the potential to ensure that new lab-based technologies move to industrial production. This community has thrived with multiple DOE Offices nurturing different parts of the ecosystem: from fundamental science to application-driven science, to manufacturing science. However, much remains to be done to take full advantage of this core expertise.

The [Advanced Manufacturing Office \(AMO\)](#) and the [Vehicle Technologies Office \(VTO\)](#) within the [U.S. Department of Energy \(DOE\)](#), [Office of Energy Efficiency and Renewable Energy \(EERE\)](#) is dedicated to improving energy and material efficiency, productivity, and competitiveness of manufacturers across the industrial sector. AMO and VTO bring together manufacturers, not-for-profit entities, research organizations, and institutions of higher education to identify challenges; catalyze innovations; and develop innovative materials, processes, and information technologies needed for an efficient and competitive domestic manufacturing sector.

The Vehicles Technology Office has been supporting research on electric batteries but there is an interest in exploring other aspects of energy storage. Learn more: <https://www.energy.gov/eere/vehicles/batteries-charging-and-electric-vehicles>.

Qualifications In order to be considered, applicants must meet each of the following criteria:

- Be a U.S. citizen.
- Be at least 18 years old by May 1, 2022.
- Meet one of the following conditions:

Opportunity Title: 2022 Energy Storage Summer Internships

Opportunity Reference Code: DOE-EERE-EnergyStorage-2022

- Recent graduate: Have earned an undergraduate or graduate degree in the past two years in a discipline related to energy storage.
- Undergraduate Student: Be enrolled as a full-time student as a junior or senior at a U.S. accredited college or university pursuing a degree in a discipline related to energy storage.
- Graduate Student: Be enrolled as a full-time graduate student at a U.S. accredited college or university pursuing a degree in a discipline related to energy storage.

Eligible disciplines can be found in the list below.

A complete application consists of:

- A completed Zintellect profile
- Essay Questions - The application includes questions specific to the opportunity.
- Academic Records - For this opportunity, an unofficial transcript or copy of the student academic records showing full-time enrollment for winter/spring 2022 or showing a degree was awarded within the last two years provided by the applicant or by academic advisors from internal institution systems may be submitted. Academic records must include the name, logo or other identification of the academic institution, name of the student, completed coursework, and grades.
- Current Resume/Curriculum Vitae
- One (1) Recommendation - Applicants are required to provide contact information for one recommendation in order to complete the application. You are encouraged to request a recommendation from a professional who can speak to your abilities and potential for success as well as your scientific capabilities and personal characteristics. **Recommendation requests must be sent through the Zintellect application system.** Recommenders will be asked to complete a recommendation in Zintellect. Letters of recommendation submitted via email will not be accepted. **Recommendation must be received in the Zintellect system by Tuesday, January 25, 2022 11:59 PM EST.**

Submitted documents must have all social security numbers, student identification numbers, and/or dates of birth removed (blacked out, blackened out, made illegible, etc.) prior to uploading into the application system. All documents must be submitted via Zintellect. All application components **must** be received in the system in order to be considered.

If you have questions, please send an email to AMO.Internships@orise.orau.gov. Please list the reference code [EERE-EnergyStorage-2022] for this opportunity in the subject line of your email.

Connect with ORISE...on the GO! Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond.

Eligibility Requirements

- **Citizenship:** U.S. Citizen Only
- **Degree:** Bachelor's Degree, Master's Degree, or Doctoral Degree received within the last 24 months or currently pursuing.
- **Discipline(s):**
 - **Computer, Information, and Data Sciences** (16 )
 - **Earth and Geosciences** (1 )
 - **Engineering** (27 )
 - **Environmental and Marine Sciences** (2 )
 - **Mathematics and Statistics** (10 )
 - **Other Physical Sciences** (12 )
 - **Other S&E-Related** (1 )
 - **Physics** (16 )
- **Age:** Must be 18 years old by 5/1/2022
