

**Opportunity Title:** Public Health Analyst at EPA

**Opportunity Reference Code:** EPA-NSSC-0005-48-2-1-2022

**Organization** U.S. Environmental Protection Agency (EPA)

**Reference Code** EPA-NSSC-0005-48-2-1-2022

**How to Apply** Click [HERE](#) to Apply

**Description** The EPA National Student Services Contract has an immediate opening for a full time Public Health Analyst at EPA position with the Office of Research and Development at the EPA facility in Chapel Hill, NC.

The Office of Research and Development at the EPA supports high-quality research to improve the scientific basis for decisions on national environmental issues and help EPA achieve its environmental goals. Research is conducted in a broad range of environmental areas by scientists in EPA laboratories and at universities across the country.

#### **What the EPA project is about**

The Public Health and Integrated Toxicology Division (PHITD) within the Office of Research and Development (ORD) at EPA focuses on the adverse public health impacts of environmental exposures. The Clinical Research Branch (CRB) of the PHITD operates laboratories and clinical facilities at the EPA Human Studies Facility building (HSF) and utilizes clinical data from large cohorts to study the effects of exposure to ambient pollution and other environmental exposures on human health and to elucidate biological and exposure mechanisms and the most responsive subgroups of the population. CRB is located on the campus of the University of North Carolina at Chapel Hill. Studies are conducted in close consultation with client offices in order to support the Agency's mission.

#### **What experience and skills will you gain?**

As a team member, you will work in the CRB with CRB researchers to construct a database of health records and exposure data and analyze the data in epidemiological and clinical studies. You will work within a multi-disciplinary research team and will support efforts to implement and evaluate the relationship between variations in cause-specific morbidity and variations in air quality and risk factors. Through these interactions you will be exposed to the philosophical and functional questions which arise when handling volumes of patient records and will receive premier instruction in analytic and ethical concerns which must be properly considered for the success of projects centered around electronic medical records and other health outcome data. You will be expected to attend regular staff meetings. You will assist a research team with analytical, data management and documentation, and communication responsibilities required to support and maintain a robust research program.

#### **How you will apply your skills**

##### **Analytical responsibilities:**

- Conducting exploratory analyses, developing summary tables and graphical displays of data and analytical results;

**ORAU Pathfinder**

**Opportunity Title:** Public Health Analyst at EPA

**Opportunity Reference Code:** EPA-NSSC-0005-48-2-1-2022

- Implementing statistical models to assess association between environmental exposures and health outcomes;
- Developing geospatial datasets of environmental exposures;
- Assisting with the preparation of written documents, including documentation of software, data handling procedures, and statistical summaries of analytic results; and
- Developing pipelines to improve automation and standardization of data extraction, aggregation, exploration, and analysis.

**Data Management responsibilities:**

- Extracting, cleaning, linking, merging, documenting and managing databases containing both environmental and health data;
- Maintaining records of meetings, correspondence, and action documents, and maintain a system to track projects in progress; and
- Preparing detailed documentation of their efforts.

**Communications-related responsibilities:**

- Participating as a member of a multi-disciplinary research team;
- Interacting with EPA scientists and outside collaborators; and
- Assisting in the logistics and coordination activities for briefings, meetings, workshops, and other collaborative efforts.

**Required Knowledge, Skills, Work Experience, and Education**

- Demonstrated education and/or experience in applying statistical methods in analyzing data and ability to manipulate data;
- Demonstrated education and/or experience using geospatial methods, analyses and programming;
- Significant R-language or Python programming (or equivalent open source scripting language) experience; and
- Strong written and oral communication skills.

**Location:** This job will be located EPA's facility in Chapel Hill, NC.

**Salary:** Selected applicant will become a temporary employee of ORAU and will receive an hourly wage of \$30.16 for hours worked.

**Hours:** Full-time.

**Travel:** Occasional local travel may be required.

**Expected start date:** The position is full time and expected to begin March 2022. The selected applicant will become a temporary employee of ORAU working as a contractor to EPA. The option year renews May of each year through May, 14, 2025.

**Opportunity Title:** Public Health Analyst at EPA
