If you have questions, send an email to CDCCrpp@orau.org. Please include the reference code for this opportunity in your email.

Description A fellowship opportunity is currently available with the Prevention Research Branch of the National Center on Birth Defects and Developmental Disabilities (NCBDDD) at the Centers for Disease Control and Prevention (CDC).

NCBDDD's mission is to promote the health of babies, children and adults and enhance the potential for full, productive living. Joining the Prevention Research Branch, the participant will collaborate with the Fetal Alcohol Syndrome Prevention <http://www.cdc.gov/NCBDDD/fasd/> team on various projects. Focusing on various analytical projects, literature reviews, and program assessments, specific opportunities may include:

- Participating in the development and reporting/analysis of program performance data, which may include data from the Behavioral Risk Factor Surveillance System (BRFSS), HealthStyles, DocStyles, National Drug Use and Health Survey (NDUHS) or grantee reports
- Reviewing scientific literature for studies demonstrating sustainable strategies for supporting alcohol Screening and Brief Intervention (SBI) in public and private practice settings
- Working with CDC staff and grantees to promote and advance practice and systems change around provision of alcohol SBI among targeted provider groups
- Participating in a project working with front-line staff in the Child Welfare System to assess current screening efforts used to assess prenatal alcohol and substance use among children entering that system

The Research Participation Program for CDC is administered by the Oak Ridge Institute for Science and Education (ORISE). The
