

Opportunity Title: CDC Drug Free Communities Fellowship

Opportunity Reference Code: CDC-NCIPC-2022-0193

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-NCIPC-2022-0193

How to Apply *Connect with **ORISE...on the GO!*** Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

Application Deadline 6/29/2022 3:00:00 PM Eastern Time Zone

Description ***Applications will be reviewed on a rolling-basis.**

CDC Office and Location: A fellowship opportunity is currently available in the Division of Overdose Prevention (DOP) of the National Center for Injury Prevention and Control (NCIPC) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia.

The CDC is one of the major operation components of the Department of Health and Human Services. CDC works to protect America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same.

CDC's DOP leads injury prevention efforts by using science and data to understand drug overdoses and their related harms, and to develop evidence-based prevention solutions that work. Our mission is to save lives, prevent suffering, and help reduce healthcare costs. The Division's priority is to monitor, prevent, and reduce harms associated with drug use, misuse, and overdose.

Research Project: The Drug Free Communities Support Program (DFC), created by the Drug Free Communities Act of 1997, is the Nation's leading effort to mobilize communities to prevent youth drug use. Directed by the Office of National Drug Control Policy (ONDCP), in partnership with the Centers for Disease Control and Prevention's National Center for Injury

Opportunity Title: CDC Drug Free Communities Fellowship

Opportunity Reference Code: CDC-NCIPC-2022-0193

Prevention and Control/Division of Overdose Prevention/ Drug Free Communities Support Branch provides grants to local drug-free community coalitions (over 700) to increase collaboration among community partners and to prevent and reduce youth substance use. Recognizing the fundamental concept that local problems need local solutions, DFC funded coalitions engage multiple sectors of the community and employ a variety of strategies to address local drug problems. Coalition members conduct ongoing community assessments to prioritize efforts to prevent and reduce youth drug use. These assessments are used to plan and implement data-driven, community-wide strategies.

The training activities for this research project will align with prevention activities under the Drug-Free Communities grants with coalitions. Under the guidance of a mentor the participant's training activities will be in developing processes and infrastructure to support communication, training, and assessments of programmatic and community-based activities.

Learning Objectives: Our program is committed to ensuring that all programmatic work is informed by the best available science, and that we leverage programmatic insight to shape future scientific agendas.

Scientific Support for CDC-Funded recipients:

- Intensive training experience on the intersection of science and program.
- Development of Evaluation and Communication Products.
- Train in the development of a host of communication products that reflect programmatic insight and experience.
- Assist in the development of programmatic resources and reports, peer-reviewed publications, and internal scientific support products.

Mentor(s): The mentor(s) for this opportunity is Karen Voetsch (kmp9@cdc.gov). If you have questions about the nature of the research please contact the mentor(s).

Anticipated Appointment Start Date: August 23, 2022. Start date is flexible and will depend on a variety of factors.

Appointment Length: The appointment will initially be for one year, but may be renewed upon recommendation of CDC and is contingent on the availability of funds.

Level of Participation: The appointment is full-time (40 hours per week).

Participant Stipend: The participant will receive a monthly stipend commensurate with educational level and experience.

Citizenship Requirements: This opportunity is available to U.S. citizens, Lawful Permanent Residents (LPR), and foreign
