

## **Opportunity Title:** USDA-ARS Postdoctoral Fellowship in Foodborne Pathogen Microbiology

Opportunity Reference Code: USDA-ARS-MW-2023-0328

**Organization** U.S. Department of Agriculture (USDA)

Reference Code USDA-ARS-MW-2023-0328

How to Apply Connect with ORISE...on the GO! Download the new ORISE GO mobile app in the Apple App Store or Google Play Store to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application consists of:

- An application
- Transcript(s) For this opportunity, an unofficial transcript or copy of the student academic records printed by the applicant or by academic advisors from internal institution systems may be submitted. Click <u>here</u> for detailed information about acceptable transcripts.
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional recommendations

All documents must be in English or include an official English translation.

Application Deadline 10/6/2023 3:00:00 PM Eastern Time Zone

## Description \*Applications are reviewed on a rolling-basis.

ARS Office/Lab and Location: A research opportunity is currently available with the U.S. Department of Agriculture (USDA) Agricultural Research Service (ARS) at the National Animal Disease Center (NADC) located in Ames, Iowa.

The ARS is the USDA's chief scientific in-house research agency with a mission to find solutions to agricultural problems that affect Americans every day from field to table. ARS will deliver cutting-edge, scientific tools and innovative solutions for American farmers, producers, industry, and communities to support the nourishment and well-being of all people; sustain our nation's agroecosystems and natural resources; and ensure the economic competitiveness and excellence of our agriculture. The vision of the agency is to provide global leadership in agricultural discoveries through scientific excellence.

The NADC is the premier research institute within the USDA for studying diseases of large animals. At the NADC, scientists are able to investigate microbe-host interactions from every perspective—molecular, microbe, and natural host. Team members and collaborators include microbiologists, molecular biologists, pathologists, veterinarians, and animal scientists.

**Research Project:** The Food Safety and Enteric Pathogens Research Unit in the NADC is seeking a Postdoctoral Research Fellow to conduct research on host-microbe interactions within the animal intestinal tract, including the development of synthetic microbial communities to reduce foodborne pathogens in poultry. The selected fellow will use transcriptomic, genomic, and microbial community analyses to support the project that characterizes these interactions, with the goal of identifying alternatives to

## W ORISE GO

The ORISE GO mobile app helps you stay engaged, connected and informed during your ORISE experience – from application, to offer, through your appointment and even as an ORISE alum!

**Opportunity Title:** USDA-ARS Postdoctoral Fellowship in Foodborne Pathogen Microbiology

Opportunity Reference Code: USDA-ARS-MW-2023-0328

antibiotics to control foodborne pathogens.

Current research focuses on: reducing colonization and antibiotic resistance of foodborne pathogens (notably *Campylobacter* and *Salmonella*); exploiting interactions among the host, its commensal bacteria, and foodborne pathogens; and establishing

links between microbial membership and metabolic function in the gut. <u>Learning Objectives</u>: The participant will gain useful experience designing and conducting experiments in collaboration with a team of microbiologists,

and conducting experiments in collaboration with a team of microbiologists, immunologists, and veterinarians. The participant will be trained in an array of methodologies and technologies to fulfill the objectives of the project including anaerobic microbiology, microbial genomics, metagenomics, molecular biology, and computational biology.

<u>Mentor(s)</u>: The mentor for this opportunity is Torey Looft (<u>torey.looft@usda.gov</u>). If you have questions about the nature of the research please contact the mentor.

<u>Anticipated Appointment Start Date</u>: 2023. Start date subject to change based on a variety of reasons, and start date may be flexible to accommodate the needs of a qualified candidate.

<u>Appointment Length</u>: The appointment will initially be for one year, but may be extended upon recommendation of ARS and is contingent on the availability of funds.

Level of Participation: The appointment is full-time.

Participant Stipend: The participant will receive a monthly stipend commensurate with educational level and experience. The current stipend for this opportunity is equal to \$69,000 - \$82,000 per year based on experience. A Health Insurance supplement will be provided along with a \$1,000 Relocation allowance and a \$3,000 Training/Travel allowance.

<u>Citizenship Requirements</u>: This opportunity is available to U.S. citizens, Lawful Permanent Residents (LPR), and foreign nationals. Non-U.S. citizen applicants should refer to the <u>Guidelines for Non-U.S. Citizens Details</u> page of the program website for information about the valid immigration statuses that are acceptable for program participation.

**ORISE Information**: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and ARS. Participants do not become employees of USDA, ARS, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is required for participation in this program. Health insurance can be obtained through ORISE.

<u>Questions</u>: Please visit our <u>Program Website</u>. After reading, if you have additional questions about the application process please email <u>ORISE.ARS.Midwest@orau.org</u> and include the reference code for this opportunity.

**Qualifications** The qualified candidate should have received a doctoral degree in one of the relevant fields (e.g. Microbiology, Computational Biology), or be currently pursuing the degree with completion by December 31,

**Opportunity Title:** USDA-ARS Postdoctoral Fellowship in Foodborne Pathogen Microbiology

Opportunity Reference Code: USDA-ARS-MW-2023-0328

2023. Degree must have been received within five years of the appointment start date.

Preferred Skills:

- Specialized research experience in:
  - Microbiology
  - Molecular biology (including next gen sequencing)
  - Use of Linux operating systems
  - Analyses of large datasets
  - Fluency in at least one scripting language
  - Use of biological databases and various bioinformatics tools
  - Technical writing for peer-reviewed publications
- Additional knowledge of statistical inference methods, microbial ecology, molecular biology, and/or genetics
- · Good interpersonal and public speaking skills
- Demonstrated skills and research ability investigating microbial-host interactions, including computational analysis of transcriptomic and population-scale metagenomic data

**Eligibility** • **Degree:** Doctoral Degree received within the last 60 months or anticipated to be received by 12/31/2023 11:59:00 PM.

- Discipline(s):

  - Life Health and Medical Sciences (48 )
- Veteran Status: Veterans Preference, degree received within the last 120 month(s).
