

**Opportunity Title:** Earth Science: Vegetation and Soil Sciences

**Opportunity Reference Code:** 0087-NPP-MAR26-GSFC-EarthSci

**Organization** National Aeronautics and Space Administration (NASA)

**Reference Code** 0087-NPP-MAR26-GSFC-EarthSci

**How to Apply** All applications must be submitted in [Zintellect](#)

Please visit the NASA Postdoctoral Program website for application instructions and requirements: [How to Apply | NASA Postdoctoral Program \(oua.org\)](#).

A complete application to the NASA Postdoctoral Program includes:

1. Research proposal
2. Three letters of recommendation
3. Official doctoral transcript documents

**Application Deadline** 4/2/2026 6:00:59 PM Eastern Time Zone

**Description** About the [NASA Postdoctoral Program](#)

The [NASA Postdoctoral Program \(NPP\)](#) offers unique research opportunities to highly-talented scientists to engage in ongoing NASA research projects at a NASA Center, NASA Headquarters, or at a NASA-affiliated research institute. These one- to three-year fellowships are competitive and are designed to advance NASA's missions in space science, Earth science, aeronautics, space operations, exploration systems, and astrobiology.

**Description:**

This opportunity is closed to applicants who are Senior Fellows (5-years or more past PhD).

The development and use of space-based remote-sensing instruments provides a unique vantage point from which to characterize the physical and biological properties of the Earth's surface and their time-dependent behavior. Decades of observations from space-based systems also capture the imprint of human activity and climate change, including feedbacks from land use and land cover change on the Earth system. The Biospheric Sciences Laboratory is a leader in the development and use of ground-based, airborne, and satellite instruments to measure, monitor, map, and model surface phenomena. Priority areas of research include the analysis of global-scale ecological processes, particularly as they relate to the influence of climate change and anthropogenic activity; terrestrial carbon cycle; fires, hurricanes, and other large-scale disturbance processes; regional-scale forest ecosystem dynamics in boreal, temperate, and tropical forest ecosystems; and 3-D modeling of light scattering and absorption within the vegetation profile to support the improvement of terrestrial ecosystem for coupling with GCMs. To obtain a more detailed description of the research activities within the Biospheric Sciences Laboratory, please visit the Lab Web page at <https://earth.gsfc.nasa.gov/bio/>

**Location:**

Goddard Space Flight Center  
Greenbelt, Maryland

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

**Applications with citizens from Designated Countries will not be accepted at this time, unless they are Legal Permanent Residents of the United States.** A complete list of Designated Countries can be found at: <https://www.nasa.gov/oiir/export-control>.

Eligibility is currently open to:

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status
