

Opportunity Title: NSF Mathematical Sciences Graduate Internship (MSGI)

Program

Opportunity Reference Code: NSF-2016-1000

Organization National Science Foundation (NSF)

Reference Code NSF-2016-1000

How to Apply A complete application consists of:

- All required fields in both the profile and application form
- Academic records showing the equivalent of at least one year of full-time graduate school attendance prior to Fall 2016. For students in the first year of graduate school, a complete academic transcript of the undergraduate degree must be provided. Academic records must include the name of the academic institution, name of the student, completed coursework, and grades. Unofficial transcripts or copies of the student academic records printed by the applicant or by academic advisors from internal institutional systems may be submitted. Selected candidates must provide copies of official transcripts before the appointment can start.
- Proof of full-time enrollment and courses taken during the Fall 2016 term. If this information is missing from the academic record, additional documentation is required.
- Minimum of two relevant letters of references. These letters should address the student's academic record and potential for success in an internship, as indicated by communication and teamwork skills.

If you have questions, please send an email to [NSF-MSGI@ORISE.ORAU.GOV](mailto:MSGI@ORISE.ORAU.GOV). Please list the reference code for this opportunity in the subject line of your email.

For program details, please visit: <http://www.orise.orau.gov/nsf-msgi/default.html>

Application Deadline 3/1/2017 8:00:00 AM Eastern Time Zone

Description The National Science Foundation (NSF) Division of Mathematical Sciences (DMS) aims to provide opportunities to enrich the training of graduate students in the Mathematical Sciences through the provision of an NSF DMS summer research internship program. The internships are aimed at students who are interested in understanding the application of advanced mathematical and statistical techniques to "real world" problems, regardless of whether the student plans to pursue an academic or nonacademic career.

Applicants will select their primary and secondary area of interest from the following list of disciplinary areas of the mathematical sciences supported by the NSF Division of Mathematical Sciences.

- Algebra and Number Theory
- Analysis
- Applied Mathematics
- Combinatorics
- Computational Mathematics
- Foundations

Opportunity Title: NSF Mathematical Sciences Graduate Internship (MSGI)
Program

Opportunity Reference Code: NSF-2016-1000

- Geometric Analysis
- Mathematical Biology
- Probability
- Statistics
- Topology

Applicants are encouraged to review the information about DMS research areas at <http://www.nsf.gov/funding/programs.jsp?org=DMS>

Length and Location of Appointment

Internship appointments are 10 consecutive weeks on site at the assigned hosting facility between the months of April and September. Applicants may propose up to three domestically based facilities offering an internship for doctoral students in the Mathematical Sciences. Facilities may include federal national laboratories and other non-university research facilities in industry, non-profit organizations, and government.

For a list of hosting facilities, please visit: <http://www.orise.orau.gov/nsf-msgi/applicants/host-sites.html>

Participant Benefits

- A stipend of \$1,200 per week will be paid during the 10-week internship period.
- Transportation expenses for one round trip up to \$2,000 between the participant current address and the assigned internship location will be provided.

Conditions of the Internship

- U.S. citizenship is not required for participation in the program. However, depending on the internship assignment, U.S. citizenship, permanent residence, J1 visa, or F1 visa may be required. For non-U.S. citizens, internships are contingent upon having a valid immigration status. ORISE will work with participants to determine eligibility.
- Participants are required to have health insurance coverage during the internship period and provide proof of coverage prior to the start of the internship.

Nature of Appointment

The participant will not enter into an employee/employer relationship with ORISE, ORAU, DOE, NSF or any other office or agency. Instead, the participant will be affiliated with ORISE for the administration of the appointment through the ORISE letter of appointment and Terms of Appointment.

Qualifications Only students meeting the following conditions will be considered:

- Full-time enrollment as a graduate student at an accredited U.S. college or university during the 2016-2017 academic year.

Opportunity Title: NSF Mathematical Sciences Graduate Internship (MSGI)
Program

Opportunity Reference Code: NSF-2016-1000

- Have a cumulative graduate GPA of 3.30 or higher on a 4.00 scale, including fall 2016 grades.
- Be pursuing a doctoral degree in mathematics, statistics or applied mathematics.

Additional Information:

- Candidates selected for an internship appointment will be required to provide proof of enrollment during Spring 2017.
- Students graduating with a doctoral degree prior to the expected internship start date are not eligible to participate.
