

Opportunity Title: Solar System Exploration: Tidal Dynamics
Opportunity Reference Code: 0112-NPP-MAR26-GSFC-PlanetSci

Organization National Aeronautics and Space Administration (NASA)

Reference Code 0112-NPP-MAR26-GSFC-PlanetSci

How to Apply All applications must be submitted in [Zintellect](#)

Please visit the NASA Postdoctoral Program website for application instructions and requirements: [How to Apply | NASA Postdoctoral Program \(orau.org\)](#).

A complete application to the NASA Postdoctoral Program includes:

1. Research proposal
2. Three letters of recommendation
3. Official doctoral transcript documents

Application Deadline 4/2/2026 6:00:59 PM Eastern Time Zone

Description About the [NASA Postdoctoral Program](#)

The [NASA Postdoctoral Program \(NPP\)](#) offers unique research opportunities to highly-talented scientists to engage in ongoing NASA research projects at a NASA Center, NASA Headquarters, or at a NASA-affiliated research institute. These one- to three-year fellowships are competitive and are designed to advance NASA's missions in space science, Earth science, aeronautics, space operations, exploration systems, and astrobiology.

Description:

The objective of this position is to conduct research on tidally driven processes operating on solar system bodies. Tides influence the orbital evolutions, thermal evolutions, rotation dynamics and surface geology on many bodies, especially icy satellites in the outer solar system. Two bodies of special interest are the icy satellites, Europa and Enceladus. On Enceladus for example, diurnal tidal shear stress may drive heating along fractures on Enceladus while tides may also open and close these cracks, allowing observed eruptions to occur. In the case of Europa, many fractures on its surface have been linked to diurnal tensile stress. Identification of tidally controlled geology also provides constraints on the internal structure of these bodies, specifically the likelihood of subsurface oceans.

Location:

Goddard Space Flight Center
Greenbelt, Maryland

Field of Science: Planetary Science

Applications with citizens from Designated Countries will not be accepted at this time, unless they are Legal Permanent Residents of the United States. A complete list of Designated Countries can be found at: <https://www.nasa.gov/oiir/export-control>.

Eligibility is currently open to:

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status
