

**Opportunity Title:** Natural Gas Hydrate: Development, Characterization, Modeling and Analysis

**Opportunity Reference Code:** NETL-Postdoc-2026-Seol

**Organization** National Energy Technology Laboratory (NETL)

**Reference Code** NETL-Postdoc-2026-Seol

**How to Apply** A complete application consists of:

- An application, including academic history, work history experiences, and honors/awards
- Description of your goals, related experience, and related skills – refer to NETL's Core Competencies and ongoing projects when applicable
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional recommendations  
You must provide contact information for at least two recommenders in your application. The first two recommendations received will be attached to your application for review by NETL. You may click the "send" (paper airplane) button to send the recommendation request email immediately after entering their information prior to submitting your application; if not, a request will automatically be sent when you submit your application. Your recommenders will receive an email with a subject line of "[Your Name] - ORISE Recommendation Request - [your email]", from [Zintellect@orau.org](mailto:Zintellect@orau.org). This email will include information on the opportunity to which you have applied, as well as a secure link to submit a recommendation for you for this application. If you ask the same person to submit a recommendation for you for multiple applications in Zintellect, they must click the unique link in each email request, but will be given the opportunity to copy over what they had previously submitted.

All documents must be in English or include an official English translation.

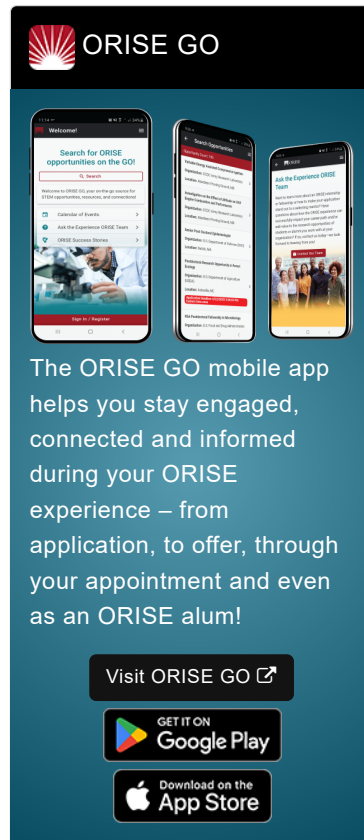

If you have questions before, during, or after you submit an application, you may reach out to [NETLinfo@orau.org](mailto:NETLinfo@orau.org).

### Application Tips

NETL values a combination of academic success, experience, and leadership potential as demonstrated in all aspects of your application. NETL's goal is to create, maintain, and support a [diverse environment](#) that encourages creative ideas and leadership. In the words of former [Lab Director Brian Anderson](#), "our differences make us stronger and we're united in fostering inclusivity in all aspects of our research to drive innovation and deliver solutions for an environmentally sustainable and prosperous energy future." In your application, show us who you are!

To increase your chances of being selected for an appointment, we recommend:

1. Tailoring your responses to align with the project. What parts of the

project are most interesting to you?

2. Spending sufficient time on your essay responses and your resume.  
Give yourself time to review your writing!
3. Ensuring that everything you submit is grammatically correct and clearly expressed.

**Application Deadline** 12/31/2026 11:59:00 PM Eastern Time Zone

**Description** The National Energy Technology Laboratory's (NETL's) record of success has been built on understanding the future of energy and the technologies required to make that future possible. We've long touted our success in developing the technologies that took on acid rain in the 1970s and mercury in the early 2000s.

### **Program Goals**

The NETL Postdoctoral Research Fellowship Program (Postdoc) is a high-intensity program designed to identify recent Doctoral graduates of high promise and to foster advanced skill development. It allows the postdoc to systematically outline career goals and helps provide the means of achieving these goals. NETL principal investigators and leads serve as mentors to postdoctoral participants during the program. This interaction affords the postdoc a unique opportunity to develop critical skills needed to become an independent professional.

The program goals include providing the opportunity to participants to:

- Develop skills and knowledge in their field of study
- Engage with new areas of basic and applied research
- Network with world-class scientists
- Exchange ideas and skills with the Laboratory community
- Use state-of-the-art equipment
- Contribute to answers for today's pressing scientific questions
- Collaborate with the broader scientific and technical communities

### **Project Details**

Through the Oak Ridge Institute for Science and Education (ORISE), this posting seeks a post-Doctoral researcher to engage in projects with the Research Innovation Center (RIC) at the National Energy Technology Laboratory (NETL) in the area of Natural Gas Hydrates under the mentorship of Yongkoo Seol. This project will be hosted at the NETL [Morgantown, WV](#) campus.

The Oil and Gas Center of Excellence at NETL-RIC (Research and Innovation Center) performs research within the National Gas Hydrate Research and Development Program to obtain pertinent, high-quality information on natural gas hydrates systems that will benefit the development of models and methods for predicting the behavior of gas hydrates in their natural environment under natural conditions and production scenarios. RIC supports major gas hydrate production field tests by providing numerical predictions on fluid migration, gas production, and potential reactions occurring during gas production activities, as well as by providing

**Opportunity Title:** Natural Gas Hydrate: Development, Characterization, Modeling and Analysis

**Opportunity Reference Code:** NETL-Postdoc-2026-Seol

fundamental understanding and knowledge on hydrate behavior derived from experimental investigations on thermal, hydrological, geomechanical, and reactive responses of hydrate.

RIC research includes:

- Numerical modeling efforts, including simulations of long-term production tests,
- Laboratory experimental tests on geomechanical stress-strain measurements,
- Water conductivity and relative permeability of fluid flow through hydrate-bearing sediments,
- High resolution visualizations of hydrate distributions and fluid migration in porous media under in situ conditions, and
- Machine learning application to gas hydrate system to develop efficient key parameter estimation tools and large-scale 3D geologic model for gas hydrate reservoir.

Learning opportunities will be given on the area of laboratory characterization of hydrate bearing sediments, numerical reservoir simulations for gas production and machine learning application, and basin petroleum system modeling and data analysis, depending on qualification and project availability.

**Stipend:** The selected participant will receive a monthly stipend commensurate with educational level and experience.

- Post-Doctoral stipend is \$7860 per month.

**Program Requirements:** To document the effectiveness of the program, participants are required to submit a pre-appointment and post-appointment survey, as well as a reflection on their appointment experience when they renew or end their appointment. The reflection should summarize their project(s), additional activities, and overall experience. Details are provided as the appointment end date approaches.

Participants may also have the opportunity to contribute to manuscripts, journal articles, book chapters, conference presentations, posters, patents, and other publications as a part of their appointment. Such achievements should also be reported to ORISE; additional details are provided after an offer has been accepted.

The National Energy Technology Laboratory (NETL), part of the U.S. Department of Energy (DOE) national laboratory system, is owned and operated by the DOE. NETL supports the DOE mission to advance the energy security of the United States. This is an educational opportunity offered by NETL and administered by the Oak Ridge Institute for Science and Education. Participants in the program are not considered employees of NETL, DOE, the program administrator, or any other office or agency.

**Qualifications** The ideal candidate would have some, but not necessarily all, knowledge of and skills in:

- High-pressure/low temperature laboratory experiments,
- Geomechanical characterization and analysis,
- High resolution image analysis
- Machine learning algorithm and application,
- Programming (C++, Fortran, Matlab, Python), and
- Basin model development (PetroMod).

**Opportunity Title:** Natural Gas Hydrate: Development, Characterization, Modeling and Analysis

**Opportunity Reference Code:** NETL-Postdoc-2026-Seol

It is recognized that not all applicants will have knowledge and experience in all of these areas. This opportunity will provide exposure to/interaction with technical experts in several of these areas.

To be eligible, you must either:

- have received a Doctoral degree within the last five years *or* be currently enrolled in a Doctoral degree program and complete the degree prior to the appointment start date.

**Point of Contact** [Cinnamon](#)

- Eligibility Requirements**
- **Degree:** Doctoral Degree received within the last 60 months or currently pursuing.
  - **Discipline(s):**
    - **Chemistry and Materials Sciences** ([12](#))
    - **Communications and Graphics Design** ([2](#))
    - **Computer, Information, and Data Sciences** ([17](#))
    - **Earth and Geosciences** ([21](#))
    - **Engineering** ([29](#))
    - **Environmental and Marine Sciences** ([14](#))
    - **Life Health and Medical Sciences** ([51](#))
    - **Mathematics and Statistics** ([11](#))
    - **Physics** ([16](#))
    - **Science & Engineering-related** ([2](#))
    - **Social and Behavioral Sciences** ([29](#))
  - **Age:** Must be 18 years of age

**Affirmation** I certify that I attend or attended a regionally accredited college or university and:

- Have an earned a Doctoral degree no more than five years before the date of application.

OR

- Will receive a Doctoral degree by the appointment start date
