

Opportunity Title: Heliophysics Science: Ionospheric Modeling (International Reference Ionosphere)

Opportunity Reference Code: 0041-NPP-NOV26-GSFC-HelioSci

Organization National Aeronautics and Space Administration (NASA)

Reference Code 0041-NPP-NOV26-GSFC-HelioSci

How to Apply All applications must be submitted in [Zintellect](#)

Please visit the NASA Postdoctoral Program website for application instructions and requirements: [How to Apply | NASA Postdoctoral Program \(orau.org\)](#).

A complete application to the NASA Postdoctoral Program includes:

1. Research proposal
2. Three letters of recommendation
3. Official doctoral transcript documents

Application Deadline 11/1/2026 6:00:59 PM Eastern Time Zone

Description About the [NASA Postdoctoral Program](#)

The [NASA Postdoctoral Program \(NPP\)](#) offers unique research opportunities to highly-talented scientists to engage in ongoing NASA research projects at a NASA Center, NASA Headquarters, or at a NASA-affiliated research institute. These one- to three-year fellowships are competitive and are designed to advance NASA's missions in space science, Earth science, aeronautics, space operations, exploration systems, and astrobiology.

Description:

Research opportunities in this area include statistical analysis of long data records to establish the regular and irregular variation patterns of ionospheric parameters (electron and ion densities and temperatures) and the representation of these variations with appropriate mathematical functions. The primary goal is to improve the International Reference Ionosphere (IRI), which is the international standard for ionospheric parameters. We are specifically interested in studies related to the variation of ionospheric densities and temperatures with the 11-year solar cycle using the large volume of *in situ* data from several ionospheric satellite missions available in the National Space Science Data Center (NSSDC) archive. Many of these data sets are available for browsing and plotting in the ATMOWeb system. Other IRI-related projects include the study of ionospheric storm effects and their representation in IRI; of special interest are the positive storm effects that are not yet included in IRI.

Location:

Goddard Space Flight Center
Greenbelt, Maryland

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

Applications with citizens from Designated Countries will not be accepted at this time, unless they are Legal Permanent Residents of the United States. A complete list of Designated Countries can be found at: <https://www.nasa.gov/oiir/export-control>.

Eligibility is currently open to:

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status
