

Opportunity Title: Space Science: Mars Exploration
Opportunity Reference Code: 0009-NPP-NOV26-ARC-PlanetSci

Organization National Aeronautics and Space Administration (NASA)

Reference Code 0009-NPP-NOV26-ARC-PlanetSci

How to Apply All applications must be submitted in [Zintellect](#)

Please visit the NASA Postdoctoral Program website for application instructions and requirements: [How to Apply | NASA Postdoctoral Program \(orau.org\)](#).

A complete application to the NASA Postdoctoral Program includes:

1. Research proposal
2. Three letters of recommendation
3. Official doctoral transcript documents

Application Deadline 11/1/2026 6:00:59 PM Eastern Time Zone

Description About the [NASA Postdoctoral Program](#)

The [NASA Postdoctoral Program \(NPP\)](#) offers unique research opportunities to highly-talented scientists to engage in ongoing NASA research projects at a NASA Center, NASA Headquarters, or at a NASA-affiliated research institute. These one- to three-year fellowships are competitive and are designed to advance NASA's missions in space science, Earth science, aeronautics, space operations, exploration systems, and astrobiology.

Description:

Multidisciplinary studies are requested to contribute to on-going and future Mars exploration opportunities. Several lines of investigation are prioritized, which include (1) development of strategies, methods and tools to search for evidence of life, present or past; (2) development and testing of instrument capabilities for the scientific exploration of Mars and for extreme environments on Earth; (3) use of terrestrial analog environments, simulation facilities and numerical models to advance fundamental understanding of the Martian atmosphere, surface and subsurface; (4) analysis of mission data; (5) research and policy development on planetary protection (prevention of harmful cross-contamination between Earth and Mars); (6) research on the geological history of Mars and identification of landing sites optimized for science and human exploration; and (7) establishment of an easily accessible, electronic information base for Mars exploration. This opportunity is tightly coupled to related opportunities entitled ""Theoretical and Experimental Studies of Planetary Atmospheres""; ""[Mars Surface Composition and Aqueous Processes](#)""; ""[Mars Fluvial Studies and Exploration](#)""; ""[Drill and Sample Handling Technology for Mars Research](#)""; and Theoretical and Experimental Studies of the Martian Environment, Impact Assessment for Future Mars Missions"".

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

Applications with citizens from Designated Countries will not be accepted at this time, unless they are Legal Permanent Residents of the United States. A complete list of Designated Countries can be found at: <https://www.nasa.gov/oiir/export-control>.

Eligibility is currently open to:

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status
