

**Opportunity Title:** Impacts of Climate Extreme Events on Health

**Opportunity Reference Code:** 0296-NPP-NOV26-GSFC-EarthSci

**Organization** National Aeronautics and Space Administration (NASA)

**Reference Code** 0296-NPP-NOV26-GSFC-EarthSci

**How to Apply** All applications must be submitted in [Zintellect](#)

Please visit the NASA Postdoctoral Program website for application instructions and requirements: [How to Apply | NASA Postdoctoral Program \(orau.org\)](#).

A complete application to the NASA Postdoctoral Program includes:

1. Research proposal
2. Three letters of recommendation
3. Official doctoral transcript documents

**Application Deadline** 11/1/2026 6:00:59 PM Eastern Time Zone

**Description** About the [NASA Postdoctoral Program](#)

The [NASA Postdoctoral Program \(NPP\)](#) offers unique research opportunities to highly-talented scientists to engage in ongoing NASA research projects at a NASA Center, NASA Headquarters, or at a NASA-affiliated research institute. These one- to three-year fellowships are competitive and are designed to advance NASA's missions in space science, Earth science, aeronautics, space operations, exploration systems, and astrobiology.

**Description:**

This opportunity is closed to applicants who are Senior Fellows (5-years or more past PhD).

The NASA Global Modeling and Assimilation Office (GMAO) is seeking a postdoctoral fellow to investigate the impacts of climate extreme events on human health. This research will utilize health data collected from hospitals across the United States, spanning a broad age range from newborns to adults. The study will also incorporate various NASA datasets, including reanalysis products, satellite observations, and subseasonal-to-seasonal (S2S) forecasts.

Key research objectives include:

1. Identifying extreme weather events strongly associated with health risks.
2. Examining the compound effects of different extreme events.
3. Investigating spatial and seasonal variability in identified climate-health relationships.
4. Exploring large-scale climatic drivers of these extreme events.
5. Evaluating the prediction skills for these events.

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

**Opportunity Title:** Impacts of Climate Extreme Events on Health

**Opportunity Reference Code:** 0296-NPP-NOV26-GSFC-EarthSci

This opportunity will entail working in the NASA high performance computing environment.

**Field of Science:** Earth Science

**Advisors:**

Michael Bosilovich

Michael.G.Bosilovich@nasa.gov

(301) 614-6147

**Questions about this opportunity?** Please email [npp@orau.org](mailto:npp@orau.org)

**Qualifications** Potential candidates should have a Ph.D. in climate science or a related field, including other desirable qualifications:

Strong data analysis skills, including experience working with large climate datasets.

Programming experience, particularly in Python, and proficiency with Linux platforms.

A proven record of publications, preferably on the climate-public health nexus.

Experience with Artificial Intelligence (AI) and Machine Learning (ML) techniques.

**Point of Contact** [Mikeala](#)

**Eligibility** • **Citizenship:** LPR or U.S. Citizen

**Requirements** • **Degree:** Doctoral Degree.
