

Opportunity Title: Solar System Exploration: Planetary Physics, Comets, and Solar Wind

Opportunity Reference Code: 0064-NPP-NOV26-GSFC-PlanetSci

Organization National Aeronautics and Space Administration (NASA)

Reference Code 0064-NPP-NOV26-GSFC-PlanetSci

How to Apply All applications must be submitted in [Zintellect](#)

Please visit the NASA Postdoctoral Program website for application instructions and requirements: [How to Apply | NASA Postdoctoral Program \(orau.org\)](#).

A complete application to the NASA Postdoctoral Program includes:

1. Research proposal
2. Three letters of recommendation
3. Official doctoral transcript documents

Application Deadline 11/1/2026 6:00:59 PM Eastern Time Zone

Description About the [NASA Postdoctoral Program](#)

The [NASA Postdoctoral Program \(NPP\)](#) offers unique research opportunities to highly-talented scientists to engage in ongoing NASA research projects at a NASA Center, NASA Headquarters, or at a NASA-affiliated research institute. These one- to three-year fellowships are competitive and are designed to advance NASA's missions in space science, Earth science, aeronautics, space operations, exploration systems, and astrobiology.

Description:

Research includes ongoing studies of Io and Io Torus, particularly time-variable phenomena. These programs also focus on aurorae on gas giants. Searches are underway for planetary bodies the orbit of Pluto.

Cometary research emphasizes the interaction of bright comets (such as Halley) with the solar wind and interplanetary magnetic field, interpreting ion structures in the comet seen in wide-angle images of the tail, and narrow-field images of the ion coma and spectra. We are also interested in what solar-wind/IMF conditions initiate the formation of transient structures in the cometary tails, where in the comet the seat of the initial disturbance resides (e.g., sunward comma, inner ion tail), and what specific instability mechanism is involved. Structures important to probe in this manner are disconnection events, folding ion tail rays, and propagating helical waves.

Location:

Goddard Space Flight Center
Greenbelt, Maryland

Field of Science: Planetary Science

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

Applications with citizens from Designated Countries will not be accepted at this time, unless they are Legal Permanent Residents of the United States. A complete list of Designated Countries can be found at: <https://www.nasa.gov/oiiir/export-control>.

Eligibility is currently open to:

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status
