

Opportunity Title: EPA Water Analysis Research Support

Opportunity Reference Code: EPA-SSP-0022-7

Organization U.S. Environmental Protection Agency (EPA)

Reference Code EPA-SSP-0022-7

Description The EPA Environmental Research and Business Support Program has an immediate opening for an EPA Water Analysis Research Support with the Office of Research and Development at the EPA facility in Ada, OK.

The Office of Research and Development at the EPA supports high-quality research to improve the scientific basis for decisions on national environmental issues and help EPA achieve its environmental goals. Research is conducted in a broad range of environmental areas by scientists in EPA laboratories and at universities across the country.

The Ground Water and Ecosystems Restoration Division (GWERD) located in Ada, Oklahoma conducts basic and applied research to understand processes affecting the quality and availability of ground water and to evaluate and develop strategies and technologies to protect ground water resources. Scientists conduct research to evaluate ground water flow and factors influencing the fate and transport of anthropogenic and naturally occurring contaminants in the subsurface. Scientists also conduct research focused on ecosystem processes and manipulations that can be used to achieve restoration goals. Researchers provide technical support to federal and state environmental regulators on issues regarding subsurface contamination, contaminant fluxes to other media (such as surface water and air), and ecosystem restoration.

To support these activities, GWERD laboratories are equipped with state-of-the-art analytical instrumentation for chemical characterization of ground water and surface water. The analytical function of the Division is critical to supporting the research and technical assistance mission of the laboratory. This project involves analytical support for the analysis of water to support research to protect surface water resources, field support for collection of samples from selected streams and reservoirs included in the study, spreadsheet and database support for file organization, and additional project support as needed.

The selected candidate shall provide field sample collection, logistics, laboratory sample analysis, data management, data curation and data analysis support for ecological and biogeochemical research projects related to floodplains, ground water, river, and watershed aquatic ecosystems. His/her time shall be split between the laboratory, field, and administrative desk duties. Primary duties shall be assisting with lab management, data collection, and input of that data into electronic formats, analytical support, and any associated administrative duties such as HASP/QAPP development or revisions. He/she shall assist with data collection activities, data checking/verification activities, data analysis, and occasional sample analysis. He/she shall be required to assist with preparation for field trips and log in/receipt of samples for processing after field trips, including glassware washing and field equipment decontamination processes at GWERD. Occasional travel to field sites and

ORAU Pathfinder

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

assistance with sample collection will also be required. He/she shall collect data, verify data, input data, and generate reports.

Depending upon experience, the selected candidate may be trained and pass a proficiency test on analytical equipment, sample preparation, and standard operating procedures for the specific equipment. Analytical and research equipment may include, but not limited to gas chromatography, spectrophotometry, fluorometry, Hach Kits, and multi-parameter sondes. He/she shall be capable of writing and communicating procedures and protocols on field and lab activities.

The selected candidate will receive hands-on lab and field research experience.

Responsibilities may include, but not limited to:

- Preparing field trip and sample collection coordination,
- Developing, managing, and maintaining systems and databases to track lab and field scientific research,
- Developing procedures and protocols to support research, and
- Developing graphs and presentation materials, prepares spreadsheets, charts, and narrative information.

The selected candidate may be expected to participate in meetings or seminars in support of the Statement of Work.

Salary: Selected applicants will become temporary employees of ORAU and will receive an hourly wage of \$20.04 for hours worked.

Hours: Full-Time

Travel: Field travel may be required, including overnight. The selected candidate shall have the ability to drive.

Expected Start Date: The position is full time and expected to begin March 2017. The selected applicant will be a temporary employee of ORAU working as a contractor to EPA. The initial contract period is through May 14, 2017, and EPA may elect to renew the contract for an additional three (3) 12-month optional periods.

Working Conditions:

The selected candidate will be supervised by a mentor who will provide day-to-day direction, as well as coach, advise, and counsel, and review his/her work. The mentor for this position will be a federal EPA employee.

This position will primarily involve work in a laboratory setting and may involve exposure to hazardous elements. Limited travel to field sites and assistance with sample collection may also be required. Work will be performed in an office or laboratory setting at the GWERD and at select field sites. During work in the laboratory the selected candidate will wear safety glasses, a laboratory coat (provided by GWERD), and closed-toed shoes. Work performed at field sites may require HAZWOPER training, life jackets, hearing protection, safety glasses, and other specialized safety

equipment (provided by GWERD) as dictated by the Health and Safety Plan for the field site. The work day will be eight hours Monday through Friday unless otherwise agreed to by him/her and EPA mentor.

For more information, contact EPAjobs@orau.org. Do not contact EPA directly.

Qualifications Eligible applicants must:

- Be at least 18 years of age and
- Have earned at a minimum a Bachelor's of science degree in ecology, biology, limnology, environmental science, chemistry, environmental engineering, or related scientific discipline from an accredited university or college within the last 24 months and
- Be a citizen of the United States of America or a Legal Permanent Resident.

EPA ORD employees, their spouses, and children are not eligible to participate in this program.

Required Knowledge, Skills, Work Experience, and Education

The applicant shall have:

- Experience with general laboratory techniques, such as using pipets, balances, preparation of solutions, etc.,
- Experience with field data collection in aquatic systems,
- Documented course work with laboratory credit in chemistry, physics, and biology,
- Physical ability to lift up to 50 pounds and tolerate hot/cold/wet field conditions during field trips for sample collection,
- Demonstrated experience with Microsoft Products Word, Excel, PowerPoint, Outlook,
- Proficiency in oral, written and electronic communication in English, and
- Demonstrated ability to work independently.

Desired Knowledge, Skills, Work Experience, and Education

It is desirable for the candidate to have:

- Demonstrated experience with R, Access, and EndNote.

How to apply:

- Submit application and supporting documents by clicking on Apply Now button.
- *For more information, contact EPAjobs@orau.org. Do not contact EPA directly.*

Eligibility Requirements	<ul style="list-style-type: none">• Citizenship: U.S. Citizen Only• Degree: Bachelor's Degree, Master's Degree, or Doctoral Degree received within the last 24 month(s).• Discipline(s):
