Opportunity Title: Subsurface Simulation
Opportunity Reference Code: NETL-Postdoc-2026-Lackey

Organization National Energy Technology Laboratory (NETL)

Reference Code NETL-Postdoc-2026-Lackey

How to Apply A complete application consists of:

- An application, including academic history, work history experiences, and honors/awards
- Description of your goals, related experience, and related skills – refer to NETL's Core Competencies and ongoing projects when applicable
- Transcripts – Click here for detailed information about acceptable transcripts
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional recommendations
  You must provide contact information for at least two recommenders in your application. The first two recommendations received will be attached to your application for review by NETL. You may click the "send" (paper airplane) button to send the recommendation request email immediately after entering their information prior to submitting your application; if not, a request will automatically be sent when you submit your application. Your recommenders will receive an email with a subject line of "[Your Name] - ORISE Recommendation Request - [your email]", from Zintellect@orau.org. This email will include information on the opportunity to which you have applied, as well as a secure link to submit a recommendation for you for this application. If you ask the same person to submit a recommendation for you for multiple applications in Zintellect, they must click the unique link in each email request, but will be given the opportunity to copy over what they had previously submitted.

All documents must be in English or include an official English translation.

If you have questions before, during, or after you submit an application, you may reach out to NETLinfo@orau.org.

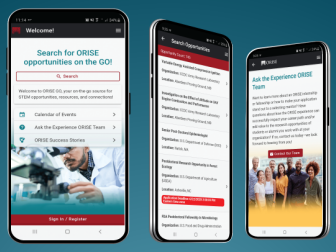

Application Tips

NETL values a combination of academic success, experience, and leadership potential as demonstrated in all aspects of your application. NETL's goal is to create, maintain, and support a diverse environment that encourages creative ideas and leadership. In the words of former Lab Director Brian Anderson, "our differences make us stronger and we're united in fostering inclusivity in all aspects of our research to drive innovation and deliver solutions for an environmentally sustainable and prosperous energy future." In your application, show us who you are!

To increase your chances of being selected for an appointment, we recommend:

1. Tailoring your responses to align with the project. What parts of the

project are most interesting to you?
2. Spending sufficient time on your essay responses and your resume. Give yourself time to review your writing!
3. Ensuring that everything you submit is grammatically correct and clearly expressed.

Application Deadline 1/1/2027 11:59:59 PM Eastern Time Zone

Description The National Energy Technology Laboratory's (NETL's) record of success has been built on understanding the future of energy and the technologies required to make that future possible. We've long touted our success in developing the technologies that took on acid rain in the 1970s and mercury in the early 2000s.

Program Goals

The NETL Postdoctoral Research Fellowship Program (Postdoc) is a high-intensity program designed to identify recent Doctoral graduates of high promise and to foster advanced skill development. It allows the postdoc to systematically outline career goals and helps provide the means of achieving these goals. NETL principal investigators and leads serve as mentors to postdoctoral participants during the program. This interaction affords the postdoc a unique opportunity to develop critical skills needed to become an independent professional.

The program goals include providing the opportunity to participants to:

- Develop skills and knowledge in their field of study
- Engage with new areas of basic and applied research
- Network with world-class scientists
- Exchange ideas and skills with the Laboratory community
- Use state-of-the-art equipment
- Contribute to answers for today's pressing scientific questions
- Collaborate with the broader scientific and technical communities

Project Details

Through the Oak Ridge Institute for Science and Education (ORISE), this posting seeks a post-Doctoral researcher to engage in projects with the Research Innovation Center (RIC) at the National Energy Technology Laboratory (NETL) in the area of Subsurface Simulation under the mentorship of Greg Lackey.This project will be hosted on-site at the NETL Pittsburgh, PA campus.

In this opportunity, the participant will collaborate with researchers on an overarching project involving unconventional enhanced oil recovery, natural gas storage, and/or produced water disposal. The overall goals of the overarching project are to: (1) close the gap between lab- and field-scale observations of enhanced recovery techniques in unconventional reservoirs, (2) identify new opportunities for safely and effectively expanding underground natural gas storage operations in the U.S., and (3) optimize produced water disposal operations to maximize stored volumes.

Opportunity Title: Subsurface Simulation
Opportunity Reference Code: NETL-Postdoc-2026-Lackey

The postdoctoral research fellow selected for this project will conduct research in collaboration with NETL federal and contract staff. You will learn how to do the following:

- Design and validate numerical reservoir models for unconventional enhanced oil recovery processes in shale and tight formations.
- Calibrate and history-match models against laboratory experiments (e.g., core-flood) and field data to understand and quantify fundamental recovery mechanisms.
- Conduct sensitivity analyses and optimization studies to identify strategies for maximizing desired subsurface outcomes (e.g., recovery efficiency, increased storage)
- Apply geostatistical methods (e.g., kriging) to characterize the spatial heterogeneity of key reservoir parameters (e.g., porosity, permeability) and quantify subsurface uncertainty through stochastic methods.
- Build 3D geologic and petrophysical models of oil and gas reservoirs using well logs, core, seismic, and completion data.
- Integrate machine-learning and data-driven techniques for reservoir proxy modeling.

Additionally, you will have the opportunity to:

- Collaborate with cross-disciplinary teams that include petroleum engineers, geologists, software developers, and data scientists.
- Publish findings in peer-reviewed journals, present at technical conferences, and contribute to proposals and reports for project sponsors.
- Gain knowledge in developing numerical reservoir simulation models for unconventional reservoirs.
- Advance subsurface characterization skills through the integration of geologic modeling, geostatistics, and uncertainty quantification.
- Build written and oral communication skills through peer-reviewed publication, presentation at technical conferences, and collaboration with a broad array of stakeholders.

Stipend: The selected participant will receive a monthly stipend commensurate with educational level and experience.

- Post-Doctoral stipend is $8126 per month.

Program Requirements: To document the effectiveness of the program, participants are required to submit a pre-appointment and post-appointment survey, as well as a reflection on their appointment experience when they renew or end their appointment. The reflection should summarize their project(s), additional activities, and overall experience. Details are provided as the appointment end date approaches.
Participants may also have the opportunity to contribute to manuscripts, journal articles, book chapters, conference presentations, posters, patents, and other publications as a part of their appointment. Such achievements should also be reported to ORISE; additional details are provided after an offer has been accepted.

Opportunity Title: Subsurface Simulation
Opportunity Reference Code: NETL-Postdoc-2026-Lackey

The National Energy Technology Laboratory (NETL), part of the U.S. Department of Energy (DOE) national laboratory system, is owned and operated by the DOE. NETL supports the DOE mission to advance the energy security of the United States. This is an educational opportunity offered by NETL and administered by the Oak Ridge Institute for Science and Education. Participants in the program are not considered employees of NETL, DOE, the program administrator, or any other office or agency.

Qualifications

The ideal candidate would have some, but not necessarily all, of the following skills:

- PhD in petroleum engineering, civil engineering, geoscience, applied mathematics or a related field.
- Experience with commercial reservoir simulators (e.g., CMG GEM, Eclipse) and/or open-source porous media transport codes (e.g., TOUGH, PFLOTRAN)
- Proficiency with geologic and geostatistical modeling tools (e.g., Petrel)
- Strong programming skills (Python, R) for data analysis and machine learning.
- Ability to research independently and collaboratively with multidisciplinary teams.

To be eligible, you must either:

- have received a Doctoral degree within the last five years *or* be currently enrolled in a Doctoral degree program and complete the degree prior to the appointment start date.

Eligibility Requirements

- **Degree:** Doctoral Degree received within the last 60 months or currently pursuing.
- **Discipline(s):**
  - **Chemistry and Materials Sciences** (12 👁)
  - **Communications and Graphics Design** (2 👁)
  - **Computer, Information, and Data Sciences** (17 👁)
  - **Earth and Geosciences** (21 👁)
  - **Engineering** (29 👁)
  - **Environmental and Marine Sciences** (14 👁)
  - **Life Health and Medical Sciences** (51 👁)
  - **Mathematics and Statistics** (11 👁)
  - **Physics** (16 👁)
  - **Science & Engineering-related** (2 👁)
  - **Social and Behavioral Sciences** (29 👁)
- **Age:** Must be 18 years of age

Affirmation

I certify that I attend or attended a regionally accredited college or university and:

Opportunity Title: Subsurface Simulation
Opportunity Reference Code: NETL-Postdoc-2026-Lackey

- Have an earned a Doctoral degree no more than five years before the date of application.

  OR

- Will receive a Doctoral degree by the appointment start date
