Application Deadline 10/15/2026 3:00:00 PM Eastern Time Zone

Description ***Applications are reviewed on a rolling-basis and applications may close before the deadline.**

CDC Office and Location: A research opportunity is available in the Centers for Disease Control and Prevention (CDC) located in Atlanta, Georgia.

The Centers for Disease Control and Prevention (CDC) is one of the major operation components of the Department of Health and Human Services. CDC protects America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same. CDC increases the health security of our nation. As the nation's health protection agency, CDC saves lives and protects people from health threats. To accomplish its mission, CDC conducts important science and provides health information that protects our nation against expensive and dangerous health threats, and responds when these arise.

The National Center for Immunization and Respiratory Diseases (NCIRD) is a center within the Centers for Disease Control and Prevention (CDC) that works to prevent and control vaccine-preventable diseases and other respiratory illnesses through immunization programs, surveillance, research, and public health initiatives. Within NCIRD, the Program Strategy and Performance Unit (PSPU) in the Office of the Director provides enterprise-level support for strategic planning, evaluation, performance improvement, and continuous learning to strengthen the effectiveness of NCIRD programs and investments. PSPU works across NCIRD divisions, leadership, subject matter experts, and partners to evaluate priorities, measure impact, monitor progress, and apply lessons learned to inform decision-making and drive continuous improvement.

Opportunity Title: CDC MVPD Evaluation Strategy Fellow (MS)

Opportunity Reference Code: CDC-2026-0115

Research Project: A research opportunity is available within PSPU, NCIRD Office of the Director, to train on the evaluation of a high-priority Measles/Vaccine-Preventable Disease (MVPD) Initiative. You will collaborate as part of a cross-functional team to train on the implementation of an evaluation approach that supports monitoring progress, assessing implementation, measuring outcomes, and identifying opportunities for improvement across multiple programs and partners.

You will have opportunities to apply evaluation and performance measurement concepts in a complex public health setting and will gain strong organizational skills, initiative, creativity, critical thinking, and the ability to turn broad objectives into concrete outcomes. You will also have opportunities to explore responsible use of emerging technologies, including artificial intelligence, as an aid to critical thinking, analysis, and productivity—not as a substitute for professional judgment.

Learning Objectives: You will:

- Gain experience on implementation of the MVPD evaluation approach, including the development and refinement of measures, data-collection methods, tracking tools, and reporting processes.
- Learn to inventory and organize existing evaluation activities, measures, data sources, and reporting practices across programs and partner organizations.
- Build skills in collecting, organizing, and synthesizing information to monitor implementation, track progress, and identify emerging findings.
- Gain experience developing practical evaluation items—such as tools, reports, presentations, and communication materials—that help teams use performance and evaluation information effectively.
- Gain experience collaborating with program teams and partners to document activities, decisions, progress, challenges, and lessons learned.
- Learn to identify opportunities to improve the usability, consistency, and coordination of evaluation and performance information across an initiative.
- Collaborate on a defined PSPU project focused on strengthening evaluation capacity or advancing evaluation practice across NCIRD.

Mentor(s): The mentor for this opportunity is

Tiffany Brunson (iqa7@cdc.gov). If you have questions about the nature of the research please contact the mentor(s).

Anticipated Appointment Start Date: **October 19, 2026.** Start date is flexible and will depend on a variety of factors.

Appointment Length: The appointment will initially be for one year, but may be renewed upon recommendation of CDC and is contingent on the availability of funds.

Level of Participation: The appointment is full time.

Opportunity Title: CDC MVPD Evaluation Strategy Fellow (MS)

Opportunity Reference Code: CDC-2026-0115

Participant Stipend: Stipend rates may vary based on numerous factors, including opportunity, location, education, and experience. If you are interviewed, you can inquire about the exact stipend rate at that time and if selected, your appointment offer will include the monthly stipend rate.

Citizenship Requirements: This opportunity is available to U.S. citizens, Lawful Permanent Residents (LPR), and foreign nationals. Non-U.S. citizen applicants should refer to the [Guidelines for Non-U.S. Citizens Details page](#) of the program website for information about the valid immigration statuses that are acceptable for program participation.

ORISE Information: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and CDC. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is required for participation in this program. Health insurance can be obtained through ORISE.

The successful applicant(s) will be required to comply with Environmental, Safety and Health (ES&H) requirements of the hosting facility.

Questions: Please visit our [Program Website](#). After reading, if you have additional questions about the application process please email CDCCrpp@ornl.gov and include the reference code for this opportunity.

Qualifications The qualified candidate should have received a master's degree in public health, epidemiology, biostatistics, program evaluation, health services research, public administration, or a related field. Degree must have been received within 5 years of the appointment start date.

Preferred skills:

- Knowledge of program evaluation, performance measurement, public health practice, or related methods.
- Experience organizing, analyzing, and synthesizing qualitative and/or quantitative information.
- Experience developing measures, data collection tools, tracking systems, reports, presentations, or other evaluation products.
- Ability to translate broad objectives into concrete tasks, deliverables, and timelines.
- Strong organizational, analytical, critical-thinking, and problem-solving skills.
- Strong written and oral communication skills.
- Ability to act collaboratively across multidisciplinary teams and organizational boundaries.
- Demonstrated initiative, adaptability, and ability to move forward with appropriate guidance.

Opportunity Title: CDC MVPD Evaluation Strategy Fellow (MS)

Opportunity Reference Code: CDC-2026-0115

- Familiarity with Excel, PowerPoint, REDCap, R, SAS, data visualization, or similar tools is desirable.
- Interest in responsibly using emerging technologies, including AI, to support analytical and evaluation

Affirmation I certify that I have not previously been employed by CDC or by a contractor working directly for CDC. I understand that CDC does not permit individuals with a prior employment relationship with CDC or its contractors to participate as trainees in the ORISE program. (Exceptions may be granted for individuals who, since the previous CDC employment, have obtained a new STEM degree which necessitates training in a new field.)
