Opportunity Title: USDA-ARS Infectious Disease Epidemiology in Support of ARS Animal Health Goals
Opportunity Reference Code: USDA-ARS-SEA-2026-0412

Organization U.S. Department of Agriculture (USDA)

Reference Code USDA-ARS-SEA-2026-0412

How to Apply ***To submit your application, scroll to the bottom of this opportunity and click APPLY.***

A complete application consists of:

- An application
- Transcript(s) – For this opportunity, an unofficial transcript or copy of the student academic records printed by the applicant or by academic advisors from internal institution systems may be submitted. Click here for detailed information about acceptable transcripts.
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional recommendations

All documents must be in English or include an official English translation.

Connect with ORISE...on the GO! Download the new ORISE GO mobile app in the Apple App Store or Google Play Store to help you stay engaged, connected, and informed during your ORISE experience and beyond!"

Application Deadline 1/1/2027 3:00:00 PM Eastern Time Zone

Description ***Applications are reviewed on a rolling-basis and applications may close before the deadline.**

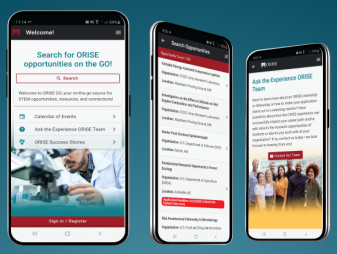

ARS Office/Lab and Location: A research opportunity is currently available with the U.S. Department of Agriculture (USDA), Agricultural Research Service (ARS), located in Starkville, Mississippi. It is expected that you will travel to other research and production sites to become familiar with the system and overall research goals of these collaborators.

The Agricultural Research Service (ARS) is the U.S. Department of Agriculture's chief scientific in-house research agency with a mission to find solutions to agricultural problems that affect Americans every day from field to table. ARS will deliver cutting-edge, scientific tools and innovative solutions for American farmers, producers, industry, and communities to support the nourishment and well-being of all people; sustain our nation's agroecosystems and natural resources; and ensure the economic competitiveness and excellence of our agriculture. The vision of the agency is to provide global leadership in agricultural discoveries through scientific excellence.

Research Project: You will be mentored by a collaborative research team in the US Department of Agriculture's Agricultural Research Service at the Geospatial and Environmental Epidemiologic Research Unit (GEERU), Office of National Programs (ONP), and the Foreign Animal Disease Research Unit (FADRU). You will learn to develop mathematical and statistical models to investigate transmission and spread of infectious diseases of livestock, poultry, and farmed cervids, with studies initially focused on highly pathogenic avian influenza.

Opportunity Title: USDA-ARS Infectious Disease Epidemiology in Support of ARS Animal Health Goals
Opportunity Reference Code: USDA-ARS-SEA-2026-0412

Collaborations with other USDA Agricultural Research Service unit scientists and Mississippi State University faculty will be expected. The experience in the interdisciplinary team includes disease ecologists, bacteriologists, virologist, and computation biologists. Peer-reviewed publication of research findings will be encouraged and supported.

Learning Objectives: Under the guidance of a mentor, you will:

- Learn to develop mathematical and statistical models of infectious-disease transmission and spread in livestock, poultry, and farmed cervids.
- Gain experience applying epidemiologic modeling methods to high-priority animal-health threats, initially including highly pathogenic avian influenza.
- Develop skills in analyzing disease dynamics, transmission pathways, outbreak risk, and factors that influence disease spread across animal populations.
- Build interdisciplinary research experience through collaboration with disease ecologists, bacteriologists, virologists, and computational biologists.
- Strengthen quantitative, computational, and data-analysis skills relevant to veterinary epidemiology and animal-disease preparedness.
- Collaborate with USDA Agricultural Research Service scientists, the Office of National Programs, the Foreign Animal Disease Research Unit, and Mississippi State University faculty.
- Develop scientific communication skills through preparation and publication of peer-reviewed research findings.

Mentor(s): The mentor for this opportunity is Joseph Purswell (joseph.purswell@usda.gov). If you have questions about the nature of the research, please contact the mentor.

Anticipated Appointment Start Date: January/February 2027. Start date is flexible and will depend on a variety of factors.

Appointment Length: The appointment will initially be for one year, but may be renewed upon recommendation of ARS and is contingent on the availability of funds.

Level of Participation: The appointment is full time.

Citizenship Requirements: This opportunity is available to U.S. citizens only.

ORISE Information: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and ARS. Participants do not become employees of USDA, ARS, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is required for participation in this program. Health insurance can be obtained

Opportunity Title: USDA-ARS Infectious Disease Epidemiology in Support of ARS Animal Health Goals
Opportunity Reference Code: USDA-ARS-SEA-2026-0412

through ORISE.

Questions: Please visit our Program Website. After reading, if you have additional questions about the application process, please email ORISE.ARS.Southeast@orau.org and include the reference code for this opportunity.

Qualifications

The qualified candidate should be currently pursuing or have received a master's or doctoral degree (PhD preferred, ideally also with a DVM) in the one of the relevant fields. Degree must have been received within the past five years, or anticipated to be received by 6/1/2027.

Preferred skills:

- Proficiency in developing epidemiologic study designs to optimize validity and control bias.
- Proficiency in using at least one common programming language (e.g., R, Python, etc.).
- Demonstrated skills in developing statistical approaches for modeling epidemiologic, spatial, and temporal data.
- Knowledge of code and software development processes and use of GitHub for managing code.
- Knowledge of livestock infectious disease and their general epidemiology, with a focus on influenza
- Knowledge of infectious disease epidemiology, disease ecology, and modeling.
- Ability to effectively collaborate with others.
- Demonstrated strong oral and written communication skills.

Stipend $62,107.00 – $74,361.00 Yearly

Eligibility Requirements

- **Citizenship:** U.S. Citizen Only
- **Degree:** Master's Degree or Doctoral Degree received within the last 60 months or anticipated to be received by 6/1/2027 11:59:00 PM.
- **Discipline(s):**
  - **Computer, Information, and Data Sciences** (4 👁)
  - **Earth and Geosciences** (7 👁)
  - **Environmental and Marine Sciences** (14 👁)
  - **Life Health and Medical Sciences** (16 👁)
  - **Mathematics and Statistics** (3 👁)
