coverage data, and create local data use strategies to achieve immunization program goals

- Compile and consolidate best practices at state and local health departments that promote and improve immunization, and identify successful interventions implemented within state and local immunization programs
- Conduct qualitative and quantitative analyses to measure correlations between vaccination coverage and demographic characteristics
- Develop evaluation tools to measure the impact of training and other interventional activities, and identify changes needed to increase their effectiveness
- Present findings and recommendations at national forums and in peer-reviewed journals

This program, administered by ORAU through its contract with the U.S. Department of Energy to manage the Oak Ridge Institute for Science and Education, was established through an interagency agreement between DOE and CDC. The initial appointment is for one year, but may be renewed upon recommendation of CDC contingent on the availability of funds. The participant will receive a monthly stipend commensurate with educational level and experience. Proof of health insurance is required for participation in this program. The appointment is full-time at CDC in the Atlanta, Georgia, area. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits.

Qualifications
