

Opportunity Title: New Methods of Crucial Element Extraction from Complex Environments

Opportunity Reference Code: DOE-MSIPP-18-6-PNNL

Deadline

Organization	U.S. Department of Energy (DOE)
Reference Code	DOE-MSIPP-18-6-PNNL
How to Apply	A complete application must include the following to be considered:
	 Completion of all required fields in the application and successful application submission Undergraduate or graduate transcripts as appropriate Two recommendations
	If you have questions, send an email to Kerri Fomby at kerri.fomby@orau.org. Please include the reference code for this opportunity in your email.
	For Technical information, contact Sabrina Hoyle at sabrina.hoyle@pnnl.gov.
Application	1/12/2018 11:59:00 PM Eastern Time Zone

Description The Minority Serving Institutions Partnership Program (MSIPP) Internships is a new program to promote the education and development of the next generation workforce in critical science, engineering, technology, and math (STEM) related disciplines that complement current and future missions of DOE national laboratories. The MSIPP Internship program is designed to provide an enhanced training environment for next generation scientists and engineers by exposing them to research challenges unique to our industry.

> MSIPP Interns will be given the opportunity to complete Summer Internships aligned with ongoing U.S. Department of Energy Office of Environmental Management (DOE-EM) research under the direction of a host national laboratory. The internship will be performed at the host national laboratory, utilizing their facilities and equipment under the guidance of a research staff member.

Minority Serving Institutions are institutions of higher education enrolling populations with significant percentages of undergraduate minority students.

Project: As global consumption of resources expand, we must turn to new, environmental sustainable, and energy efficient means of extracting resources from natural reserves. Species such as lithium, uranium and the rare earth elements are crucial to our society's energy sector. However, increased demand, decreasing production, increasing costs and global economics place a strain on standard surface mining efforts for acquiring such materials. Thus, alternate methods of extracting crucial elements must be developed. In this project, work will be focused towards using novel techniques for elements extraction

The ORISE GO mobile app helps you stay engaged, connected and informed during your ORISE experience – from application, to offer, through your appointment and even as an ORISE alum!

Opportunity Title: New Methods of Crucial Element Extraction from Complex Environments Opportunity Reference Code: DOE-MSIPP-18-6-PNNL

> from complex subsurface environments (such as geothermal brines) or complex aqueous environments (such as seawater). The researcher will be involved in experimental work testing materials for extraction from these complex environments, analytical approaches for monitoring removal and interactions of species with their near environment. This is a unique opportunity to gain experience in a new and emerging research field.

Location: This internship will be located at Pacific Northwest National Laboratory.

Salary: Selected candidate will be compensated by either a stipend or salary, and may include one round trip domestic travel to and from the host laboratory. Stipends and salaries will be commensurate with cost of living at the location of the host laboratory. Housing information will be provided to interns prior to arrival at the host laboratory, and will vary from lab to lab.

Application Deadline: January 12, 2018

Expected Start Date: The program is 10 weeks in duration, starting May 21, 2018. Start date is flexible based on laboratory and candidate availability

Qualifications Eligible applicants must:

- Be a citizen of the United States,
- Be at least 18 years of age,
- Currently enrolled as a full-time undergraduate or graduate student at an accredited Minority Serving Institution, http://orise.orau.gov/msipp/documents/approved-msi-schoollist.pdf,
- Working toward a science, technology, engineering, or mathematics (STEM) degree,
- Have an undergraduate or graduate cumulative minimum Grade Point Average (GPA) of 3.0 on a 4.0 scale, and
- · Pass a drug test upon selection to participate in the MSIPP

*The process and timing for drug testing varies from lab to lab. Use of Marijuana/Cannabis or its derivatives if prescribed is legal in some states. However, having these drugs in your system is NOT legal at United States Federal Contractor sites and National Laboratories.

Required Knowledge, Skills, Work Experience, and Education

Successful candidates will:

Opportunity Title: New Methods of Crucial Element Extraction from Complex Environments

Opportunity Reference Code: DOE-MSIPP-18-6-PNNL

• Be a current undergraduate or graduate student pursuing a degree in chemistry, or related field.

Desired Knowledge, Skills, Work Experience, and Education

It is desirable for the candidate to have:

• Previous wet chemistry laboratory experience would be an asset. Preferred class requirements are chemistry, geochemistry, geology or chemical engineering, however not required

Eligibility Requirements	 Citizenship: U.S. Citizen Only Degree: Currently pursuing a Bachelor's Degree or Master's Degree. Overall GPA: 3.00 Academic Level(s): Graduate Students, Post-Bachelor's, or Undergraduate Students. Discipline(s): Chemistry and Materials Sciences (12 (*))
Affirmation	I certify that I am at least 18 years of age and a US citizen, and

Affirmation I certify that I am at least 18 years of age and a US citizen, and am currently enrolled as a student in a degree seeking undergraduate or graduate program in a STEM field at an accredited Minority Serving Institution (MSI).
