

**Opportunity Title:** Epidemiology Fellowship

**Opportunity Reference Code:** CDC-DFWED-2018-0041

**Organization** Centers for Disease Control and Prevention (CDC)

**Reference Code** CDC-DFWED-2018-0041

**How to Apply** A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional references

All documents must be in English or include an official English translation.

If you have questions, send an email to [CDCrpp@orau.org](mailto:CDCrpp@orau.org). Please include the reference code for this opportunity in your email.

**Description** A fellowship opportunity is currently available in the Division of Foodborne, Waterborne, and Environmental Diseases (DFWED) of the National Center for Emerging and Zoonotic Infectious Diseases (NCEZID) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia.

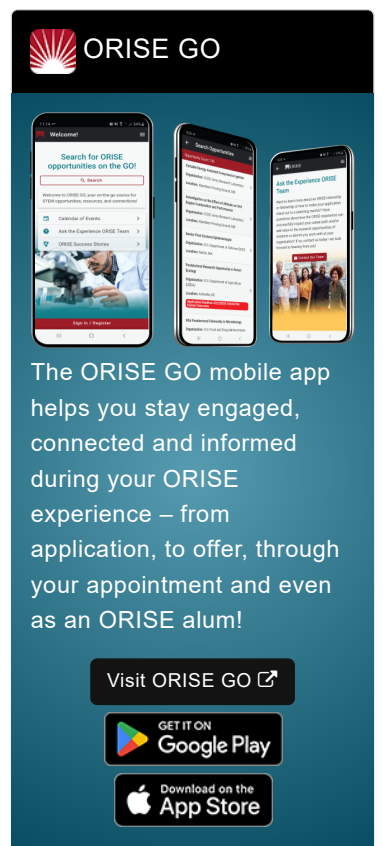

NCEZID protects public health caused by a wide range of infectious diseases, focusing on diseases that have been around many years, emerging diseases, and zoonotic diseases. Part of this focus on infectious disease transmission involves ongoing epidemiologic work through surveillance, research studies, or outbreak investigations to prevent and control waterborne disease outbreaks.

Joining DFWED, the selected participant will be placed in the Waterborne Disease Prevention Branch to provide scientific and analytical support for epidemiologic research in the area of drinking water associated health issues in the United States.

Fellows will have the opportunity to be involved in the following activities:

- Coordinating an existing multi-site study on health effects associated with low pressure events in public drinking water systems
- Drafting study status reports, developing funding proposals, and presenting to study funders and other key stakeholders
- Collecting and analyzing surveillance data, particularly drinking water-associated outbreak data, environmental or undetermined water exposure outbreak data, and giardiasis case surveillance data
- Coordinating with research teams to collect, analyze, and publish data on drinking water-associated outbreaks and health outcomes
- Engaging with new and existing partners to expand reach and identify opportunities for collaboration on drinking water research and consumer education initiatives
- Collaborating on the drafting and submission of manuscripts to peer-reviewed journals

This program, administered by ORAU through its contract with the U.S.
