

Opportunity Title: CDC Data Analysis Fellowship
Opportunity Reference Code: CDC-NCBDDD-2019-0141

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-NCBDDD-2019-0141

How to Apply A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

If you have questions, send an email to ORISE.CDC.NCBDDD@orau.org. Please include the reference code for this opportunity in your email.

Application Deadline 8/30/2019 3:00:00 PM Eastern Time Zone

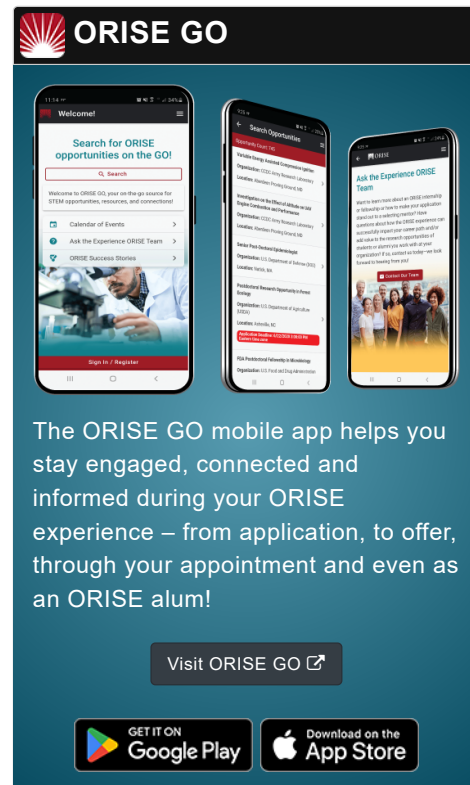

Description *Applications will be reviewed on a rolling-basis.

A research opportunity is currently available with the Prevention Research and Translation Branch, within the National Center on Birth Defects and Developmental Disabilities (NCBDDD) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia.

NCBDDD's mission is to promote the health of babies, children and adults and enhance the potential for full, productive living. Joining the Prevention Research and Translation Branch, the participant will collaborate with the Prenatal Alcohol, Opioid, and Substance Exposure team on various analytical projects, literature reviews, and program assessments. Under the guidance of a mentor, the participant will be involved in the following opportunities:

- Participating in the development and reporting/analysis of prevalence estimates of various substances, which may include data from the Behavioral Risk Factor Surveillance System (BRFSS), HealthStyles, DocStyles, National Drug Use and Health Survey (NDUHS), MarketScan or grantee reports
- Reviewing scientific literature for studies demonstrating sustainable strategies for supporting alcohol Screening and Brief Intervention (SBI) and other substances in public and private practice settings, examining economic analyses related to substance use, and identifying best practices related to infants exposed to prenatal substance use
- Collaborating with CDC staff and grantees to promote and advance practice and systems change around provision of alcohol SBI among targeted provider groups
- Contributing to a project with front-line staff in the Child Welfare System to assess current screening efforts used to assess prenatal alcohol and substance use among children entering that system

This program, administered by ORAU through its contract with the U.S. Department
