

Opportunity Title: Future Flood Conditions Assessment of the Mississippi River & Tributaries

Opportunity Reference Code: ERDC-CHL-2019-0007

Organization U.S. Department of Defense (DOD)

Reference Code ERDC-CHL-2019-0007

How to Apply Components of the online application are as follows:

- Profile Information
- Educational and Employment History
- Essay Questions (goals, experiences, and skills relevant to the opportunity)
- Resume (PDF)
- Transcripts/Academic Records - [Click here for detailed information about acceptable transcripts](#)
- References

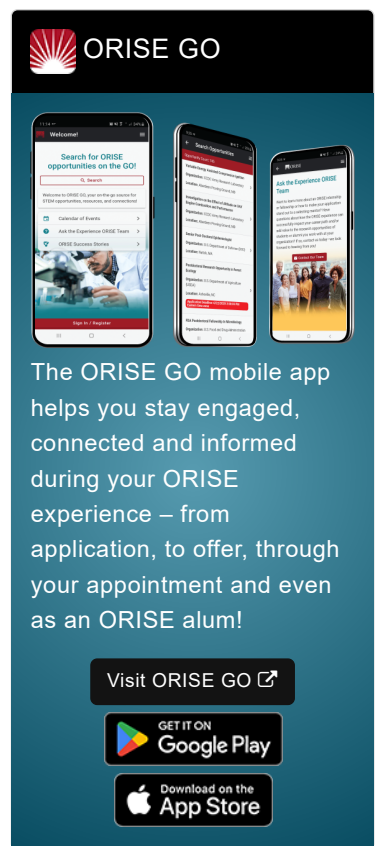

Submitted documents must have all social security numbers, student identification numbers, and/or dates of birth removed (blacked out, blackened out, made illegible, etc.) prior to uploading into the application system.

If you have questions, send an email to usace@orise.orau.gov. Please list the reference code of this opportunity in the subject line of the email.

All documents must be in English or include an official English translation.

Description The U.S. Army Engineer Research and Development Center's Coastal & Hydraulics Laboratory (CHL) performs research on ocean, estuarine, riverine, and watershed systems in support of the U.S. Army Corps of Engineers (USACE) and the Department of Defense (DOD) Task Force in support of the Ocean Commission. A multi-disciplinary team of scientists, engineers, and support personnel work in CHL's internationally known, unique facilities. This team has developed state-of-the-art experimental and computational models for solving water resource problems worldwide. Physical facilities of approximately 1.7 million square feet and high-performance computing facilities at the DOD Supercomputing Research Center (<http://www.erdchpc.mil>) are the basic infrastructure for producing cutting-edge products for successful coastal, inland water resources, and navigation management. CHL work, although primarily in support of the DOD and the Corp's districts, also interfaces with other federal, state and local agencies, academia, conservation groups, and the general public, as appropriate. The Research Participation Program for USACE-ERDC-CHL provides opportunities to participate in new and on-going applied research and development projects. Research projects range from design guidance to three-dimensional computational models. Focus is placed on inland and coastal navigation, military logistics over the shore, dredging, flood control, storm and erosion protection, waterway restoration, fish passage, hydro-environmental modeling, water/land management, and other water and sediment-related issues facing the nation. For more information about USACE-ERDC-CHL, please visit <https://www.erdchpc.usace.army.mil/locations/CHL/>.

The purpose of this research project is to conduct a comprehensive study of future flood conditions for the entire Mississippi River Basin. **Mississippi River Basin** includes all tributaries with more than 1.2 million river reaches. Research will compare and evaluate the Mississippi River and Tributaries (MR&T) Project Design Flood (PDF). This study investigates the flood recurrence values and peak flows across the entire Mississippi River Basin in response to long term climate projections and future flood conditions.

Opportunity Title: Future Flood Conditions Assessment of the Mississippi River & Tributaries

Opportunity Reference Code: ERDC-CHL-2019-0007

Through engaging in this research project at the ERDC-CHL, the participant will gain advanced knowledge in innovative modeling techniques with GIS, Excel, and Python. This project will allow the academic researchers (e.g. recent graduate or student) to continue their research while advancing the capabilities of the USACE, ERDC and the Coastal and Hydraulics Laboratory.

Appointment Length

This ORISE appointment is for a 4 month period. Appointments may be extended depending on funding availability, project assignment, program rules, and availability of the participant.

Participant Benefits

Participants will receive a stipend to be determined by ERDC-CHL. Stipends are typically based on the participant's academic standing, discipline, experience, and research facility location. Other benefits may include the following:

- Health Insurance Supplement. *Participants are eligible to purchase health insurance through ORISE.*
- Relocation Allowance
- Training and Travel Allowance

Nature of Appointment

The participant will not enter into an employee/employer relationship with ORISE, ORAU, DOD, or any other office or agency. Instead, the participant will be affiliated with ORISE for the administration of the appointment through the ORISE appointment letter and Terms of Appointment.

Qualifications Candidates with experience working with GIS, Excel, and Python preferred. Surface hydrology and water quality background is preferred. Further, applicants with hydrologic or related fields are encouraged to apply for this position.

Minimum GPA requirement is 3.0.

Currently pursuing or received Bachelor, Master, or Doctoral Degree required.

Desired start date: September 2019

- Eligibility Requirements**
- **Degree:** Bachelor's Degree, Master's Degree, or Doctoral Degree received within the last 60 months or currently pursuing.
 - **Overall GPA:** 3.00
 - **Discipline(s):**
 - **Chemistry and Materials Sciences** ([12](#))
 - **Communications and Graphics Design** ([1](#))
 - **Computer, Information, and Data Sciences** ([16](#))
 - **Earth and Geosciences** ([21](#))
 - **Engineering** ([27](#))
 - **Environmental and Marine Sciences** ([14](#))
 - **Life Health and Medical Sciences** ([45](#))
 - **Mathematics and Statistics** ([10](#))
 - **Physics** ([16](#))
 - **Science & Engineering-related** ([1](#))

Opportunity Title: Future Flood Conditions Assessment of the Mississippi River & Tributaries

Opportunity Reference Code: ERDC-CHL-2019-0007

- **Age:** Must be 18 years of age
