

Opportunity Title: CDC Public Health Research and Surveillance Fellowship **Opportunity Reference Code:** CDC-NCCDPHP-2020-0010

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-NCCDPHP-2020-0010

How to Apply A complete application consists of:

- An application
- Transcripts <u>Click here for detailed information about acceptable transcripts</u>
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

If you have questions, send an email to <u>ORISE.CDC.NCCDPHP@orau.org</u>. Please include the reference code for this opportunity in your email.

Application Deadline 12/2/2019 3:00:00 PM Eastern Time Zone

Description *Applications will be reviewed on a rolling-basis.

A research opportunity is currently available with the Office of the Director, in the Division of Nutrition, Physical Activity, and Obesity (DNPAO), within the National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia.

A healthy diet and physical activity are key behaviors that contribute to reducing the risk for obesity and other chronic diseases. A critical component of a public health response to address these behaviors is surveillance. Surveillance is used to track the behaviors as well as their environmental and policy supports.

This project will provide training to address surveillance and research issues related to nutrition, physical activity, and obesity in a public health setting. The research participant will collaborate with others to synthesize the science, identify research and surveillance gaps, and translate the science into public health actions for different aspects of nutrition, physical activity, and obesity across the lifespan.

Under the guidance of a mentor, this training opportunity may include:

- Focused learning on federal surveillance and research of nutrition, physical activity, and obesity and related research and surveillance methods; analysis of surveillance or other research data; scientific manuscript writing for publication in peer-reviewed journals
- Coordinating, updating, and reviewing data for indicators to be included in DNPAO's interactive data portal (a web based portal that displays surveillance data generated by the Division)
- Teaming with science experts in the division to analyze data and develop scientific manuscripts that describe findings from this data
- Participating in project management and strategic planning for research and surveillance projects
- Contributing to the development of communication products related to DNPAO surveillance
 and research
- · Participating in the coordination of activities related to a Division surveillance working group
