A research opportunity is currently available within the Division of Global Health Protection (DGHP) of the Center for Global Health (CGH) at the Centers for Disease Control and Prevention (CDC) located in Atlanta, Georgia. Under the guidance of a mentor, the participant will train and learn about the CDC’s global health capacity building programs through conducting key evaluation activities within the National Public Health Institute (NPHI) and/or Field and Epidemiology Training Program (FETP) in the Division of Global Health Protection (DGHP) that aims to build capacity specifically for public health institutions and workforce respectively. The participant can expect to gain (1) skills conducting operational research and participating in surveillance, (2) skills analyzing surveillance data supporting FETPs, incorporating epidemiologic and statistical analytic techniques, (3) skills in monitoring and evaluation efforts, including program data analysis and reporting, 4) skills communicating results of surveillance, program evaluation or other FETP/IMPACT studies, and 5) skills collecting and collating of surveillance data reported via several mechanisms and follow up to ensure data accuracy and completeness. Activities will be divided according to participant's interest and skills.

This program, administered by ORAU through its contract with the U.S. Department of Energy to manage the Oak Ridge Institute for Science and Education, was established through an interagency agreement between DOE and CDC. The initial appointment can be up to one year, but may be renewed upon recommendation of CDC contingent on the availability of funds. The participant will receive a monthly stipend commensurate with educational level and experience. Proof of health insurance is required for participation in this program. The appointment is full-time at CDC in the Atlanta, Georgia, area. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits.

The qualified candidate should have received a master's or doctoral degree in one of the relevant fields. Degree must have been received within five years of the appointment start date.

Preferred skills:
- Cross-cultural competency; experience working in another country or in a cross-cultural environment
- Understanding and experience with health education strategies and/or instructional design
- Excellent communicator, capable of written and verbal communications for multiple audiences (e.g., government, general public)
- Experience in evaluation, including data collection, tool development, evaluation, and reporting
- Willingness to travel to (~2-4 times per year) to countries in Africa and Asia

**Eligibility Requirements**
- **Degree:** Master's Degree or Doctoral Degree received within the last 60 month(s).
- **Discipline(s):**
  - Communications and Graphics Design (1 ☑)
Opportunity Title: CDC Evaluation and Surveillance Fellowship
Opportunity Reference Code: CDC-CGH-2020-0097

- Life Health and Medical Sciences (47)
- Social and Behavioral Sciences (32)
