

Opportunity Title: CDC Public Health Policy Fellowship
Opportunity Reference Code: CDC-NCCDPHP-2020-0147

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-NCCDPHP-2020-0147

How to Apply A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

If you have questions, send an email to ORISE.CDC.NCCDPHP@orau.org. Please include the reference code for this opportunity in your email.

Application Deadline 7/30/2020 3:00:00 PM Eastern Time Zone

Description *Applications will be reviewed on a rolling-basis.

A research opportunity is currently available with the Division of Diabetes Translation (DDT), within the National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia.

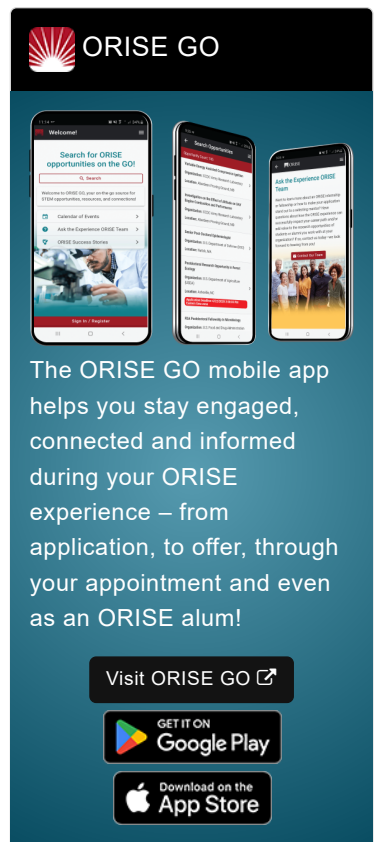

DDT is at the leading edge of the nation's efforts to end the devastation of diabetes. The division works with other federal agencies, state health departments, health care providers, and community organizations to identify people with prediabetes, prevent type 2 diabetes, prevent diabetes complications, and improve the health of all people with diabetes. These efforts have helped millions of Americans reduce their risk of type 2 diabetes and prevent or delay serious diabetes complications.

During this project, the participant will be a member of a multi-disciplinary team and obtain advanced experiential learning in the development of various policy-focused materials for diabetes topics. The participant will be involved in public health policy, planning, and evaluation activities in an organizational unit at CDC. The primary activities will include: 1) support for activities that advance the work of the Division and Center, 2) contribute to the development of public health policy briefs and position statements on key issues, and 3) participate in public health legislative analysis, issues management, policy research, and program evaluations.

The Policy Team in DDT's Office of Policy, Partnerships, and Strategic Communication provides guidance and support for planning, implementing, managing, and evaluating multifaceted public health communication and marketing programs and campaigns.

Under the guidance of a mentor, the participant will be involved and learn about the following research activities:

- Participating in identifying and analyzing public health legislation,

regulations, executive directives, departmental policy issuances, or other highly visible actions that may impact public health and/or the current activities, goals, and/or mission of the program

- Learning to develop background information, editing, layout, design, and charts for briefings, presentations, and speeches to CDC constituents, Congressional staff, and Departmental officials
- Learning and observing the CDC budget formulation process (e.g., budget justification, performance metrics, and other budget-related documents) by collaborating with mentor, contacts in the program, and the organization's resource management officials
- Learning how to communicate externally with the full range of agency stakeholders. Stakeholders include officials from CDC, Department of Health and Human Services, and other Federal agencies, Office of Management and Budget and the White House and representatives of health, education, academic and voluntary organizations, Congressional/legislative committees and staff, state and/or tribal governments, local communities, and individual members of the general public.
- Participating in and learning to develop and compile materials to explain programs to the general public and to specific groups, such as legislative subcommittees, state policy makers, and other groups interested in specific program activities
- Contributing to the preparation of responses to controlled correspondences and perform the full range of analysis, evaluation, and resolution for non-complex information requests
- Performing special projects to analyze and/or identify specific concerns or conditions of relevance and importance to the mission and activities of the center and division (e.g., various types of environmental scanning, review of internal and external communications, assessment of media, governmental and public interest in public health issues, and other types of analyses)
- Contributing and learning about the preparation of written documents that reflect a thorough knowledge of complex public health issues and appropriate health communication, health promotion, and marketing intervention strategies
- Remain current and informed on most issues, policies, and scientific research findings that may influence the planning of relevant public health programs and provides support to those responsible for answering Congressional and constituent organization requests, including controlled correspondence, telephone, and other immediate requests that are highly sensitive and complex
- Participate in researching and developing messages and materials that are valid and consistent with program objectives and are based on communication and marketing theory and principles as well as audience research (including concept, message, and Web-usability testing)
- Attending trainings and webinars on policy and communication related topics (e.g., CDC budget and appropriations, congressional training, communication evaluation, plain language, digital first principles)
- Participating in and learning to collect data that will contribute to the development of products such as fact sheets, program briefings, Questions and Answers, program summaries, and congressional policy tracking
- Learning to collaborate with Center Division policy offices and others within the Office of the Director to provide support on policy issues and requests

Opportunity Title: CDC Public Health Policy Fellowship

Opportunity Reference Code: CDC-NCCDPHP-2020-0147

This program, administered by ORAU through its contract with the U.S. Department of Energy to manage the Oak Ridge Institute for Science and Education, was established through an interagency agreement between DOE and CDC. The initial appointment can be up to one year, but may be renewed upon recommendation of CDC contingent on the availability of funds. The participant will receive a monthly stipend commensurate with educational level and experience. Proof of health insurance is required for participation in this program. The appointment is full-time at CDC in the Atlanta, Georgia, area. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits.

Qualifications The qualified candidate should have received a master's degree in one of the relevant fields, or be currently pursuing the degree and will reach completion by the end of December 2020. Degree must have been received within five years of the appointment start date.

Preferred skills:

- Experience in applying analytical and evaluative techniques to the identification, consideration, and resolution of public health issues or problems of a procedural or factual nature
- Knowledge of public health practices and principles
- Proficiency in understanding and writing clearly about complex, sophisticated health science topics
- Ability to use qualitative and quantitative analytical techniques
- Knowledge about diabetes or chronic diseases

- Eligibility Requirements**
- **Citizenship:** LPR or U.S. Citizen
 - **Degree:** Master's Degree received within the last 60 months or anticipated to be received by 12/31/2020 11:59:00 PM.
 - **Discipline(s):**
 - **Communications and Graphics Design** (1 )
 - **Life Health and Medical Sciences** (1 )
 - **Social and Behavioral Sciences** (1 )
