Description

The U.S. Army Cold Regions Research and Engineering Laboratory (CRREL) (est. February 1, 1961) solves interdisciplinary, strategically important problems for the Corps of Engineers, Army, Department of Defense, and the Nation. CRREL discovers, develops, and delivers advanced and applied science and engineering to complex environments, materials, and processes in all seasons and climates. The U.S. Army Engineer Research and Development Center, CRREL is a national resource focused on solving specific, customer-driven problems and conducting innovative research in five program areas - Civil Works - Engineered Resilient Systems - Environmental Quality & Installations - Geospatial Research & Engineering - Military Engineering.

The selected participants will research alongside CRREL staff and primary researchers. Under the guidance of a mentor, participants will gain hands-on experience in a real world laboratory environment, in addition to modern research technologies and techniques. This experience will also focus on personal career development in the areas of STEM, providing opportunities to collaborate and network with other students and researchers across all STEM disciplines.

Research areas include:

- Science and technology for national security
- Unique, multidisciplinary expertise related to the Earth's cold regions
- Biogeochemical Sciences
- Force Projection and Sustainment
- Remote Sensing/Geographic Information Systems Center of Expertise
  - U.S. Ice Jam Database
  - U.S. National Levee Database
- Signature Physics
- Terrestrial and Cryospheric Sciences
