

Opportunity Title: Chemical Synthesis and Surface Functionalization of Novel Nanomaterials via Plasma Technologies

Opportunity Reference Code: ARL-C-WMRD-300096

Organization DEVCOM Army Research Laboratory

Reference Code ARL-C-WMRD-300096

Description About the Research

Conduct research on plasma-based chemical synthesis and surface functionalization for novel energetic materials with a focus on metal nanoparticles and nanocomposites utilizing emerging atmospheric pressure and low pressure plasma technologies. The approaches include but are not limited to investigate applicable plasma chemistry and physics, employ methodologies, and conduct material characterization for new pathways of producing a wide variety of novel materials for Army applications. Products from different methods will be evaluated and compared via different analyses for experiment optimizations. The project is a collaborative effort with scientists and engineers having multi-disciplinary expertise from ARL and external DoD/university partners to address and resolve technical challenges in the field related to mission and customer-funded programs.

Keywords: Material Characterization, Semiconductor, Thin Film Growth, SEM, TEM, EDS, Rama, XRD, DC, RF, Microwave, Magnetron, Sputtering, Coating, Plasma, Surface Science

ARL Advisor: Chi-Chin Wu

ARL Advisor Email: chi-chin.wu.civ@mail.mil

About WMRD

The goals of the Weapons and Materials Research Directorate (WMRD) are to enhance the lethality and survivability of weapons systems, and to meet the soldier's technology needs for advanced weaponry and protection. Research is pursued in energetic materials dynamics, propulsion/flight physics, projectile warhead mechanics, terminal effects phenomena, armor/survivability technologies, environmental chemistry, and advanced materials (energetic, metals, ceramics, polymers, composite/hybrids, and mechanics) for armor, armament, missiles, ground vehicles, helicopters, and individual soldier applications necessary for maintaining and ensuring supremacy in future land warfare.

About ARL-RAP

The [Army Research Laboratory Research Associateship Program](#) (ARL-RAP) is designed to significantly increase the involvement of creative and highly trained scientists and engineers from academia and industry in scientific and technical areas of interest and relevance to the Army. Scientists and Engineers at the CCDC Army Research Laboratory (ARL) help shape and execute the Army's program for meeting the challenge of developing technologies that will support Army forces in meeting future operational needs by pursuing scientific research and technological developments in diverse fields such as: applied mathematics, atmospheric characterization, simulation and human modeling, digital/optical signal processing, nanotechnology, material science and technology,

ORAU Pathfinder

Whether you are just starting your career or already at a senior level, ORAU offers internships, fellowships, research opportunities, and contract positions that can provide you with invaluable experience. Download the ORAU Pathfinder mobile app and find the right opportunity to propel you along your career path!

Opportunity Title: Chemical Synthesis and Surface Functionalization of Novel Nanomaterials via Plasma Technologies

Opportunity Reference Code: ARL-C-WMRD-300096

multifunctional technology, combustion processes, propulsion and flight physics, communication and networking, and computational and information sciences.

A complete application includes:

- **Curriculum Vitae or Resume**
- **Three References Forms**
 - An email with a link to the reference form will be available in Zintellect to the applicant upon completion of the on-line application. Please send this email to persons you have selected to complete a reference.
 - References should be from persons familiar with your educational and professional qualifications (include your thesis or dissertation advisor, if applicable)
- **Transcripts**
 - Transcript verifying receipt of degree must be submitted with the application. Student/unofficial copy is acceptable

If selected by an advisor the participant will also be required to write a **research proposal** to submit to the ARL-RAP review panel for :

- Research topic should relate to a specific opportunity at ARL (see [Research Areas](#))
- The objective of the research topic should be clear and have a defined outcome
- Explain the direction you plan to pursue
- Include expected period for completing the study
- Include a brief background such as preparation and motivation for the research
- References of published efforts may be used to improve the proposal

A link to upload the proposal will be provided to the applicant once the advisor has made their selection.

Questions about this opportunity? Please email ARLFellowship@ora.u.org

- Eligibility Requirements**
- **Citizenship:** U.S. Citizen Only
 - **Degree:** Doctoral Degree.
 - **Academic Level(s):** Any academic level.
 - **Discipline(s):**
 - **Chemistry and Materials Sciences** ([12](#))
 - **Engineering** ([27](#))
 - **Physics** ([16](#))
 - **Age:** Must be 18 years of age
